Spécialités:
Glacier dans le bassin versant,

Matériel:
Cordes: 2x 70m

Résumé: (traduction alternative)
Cut canyon, only feasible in fall.

Hydrologie: (traduction alternative)
Small glacier in the catchment area.

Accès: (traduction alternative)
The best place to park is where the road crosses the stream, at 1150m. So that the superiore is above it, and the short inferiore below it.

Approche: (traduction alternative)
The hiking trail crosses the stream at an altitude of 1487m, from where you walk a few meters back down to the entry point.

Tour: (traduction alternative)
The upper part is quite steep and very continuous, unfortunately almost a bit too short.
Then it goes flat for a long time until you cross the road where you parked, and then there is another short but beautiful part with 4 rappels.

Retour: (traduction alternative)
After the tour, it's a 15-minute walk back up to the car.

Good water level, also good grip for walking. However, there is a rappel where the stand has slid backwards and pulling off the rope is very difficult. At the big rappel there is a sharp edge after 15m, be sure to give rope, after one person the coat was already through with ours! (traduction alternative)

Have set 4-5 new anchors. With the water level it gets pretty wild in the short parts below the road. (traduction alternative)
