Transporto: a piedi	**Tipo di roccia:** limestone	**Area di ingresso:** 7.30km²
Stagione: settembre - novembre	**Orientamento:** Sud	**Tempo migliore:** 10-16 Ore
Valutazione: ☆ 4.5 (5)	**Info:** ★ 2.3 (4)	**Belay:** ★ 2 (5)

Specialità:
Ghiacciaio nel bacino idrografico,

Attrezzatura:
Corde: 2x60m

Sintesi: (traduzione alternativa)
First rappel in limestone, then superiore vertical max c120 (30 / 50 / 40).

Idrologia: (traduzione alternativa)
Canyon fed by a glacier. Recommended in the fall (October-November).

Accesso:

Avvicinamento: (traduzione alternativa)
Shortly before you reach the dam, climb up the steep path on your right for 150 m, between a small stream and a rock barrier, until you reach the official hiking trail. From there, continue hiking to the left until you reach the bridge at 2049 m. You can either start here or continue your hike to the upper section, which begins at 2130 m.

Giro: (traduzione alternativa)
Great tour, cool rappels in the top part in beautiful limestone, then super vertical. When you've had enough, you come to the siphon, and at the end, you'll be rappelling down the last waterfalls.

Max c120 (30 / 50 / 40)

From the top, there are a total of four different parts where exits are possible. The very striking high waterfall marks the third part with beautiful and exposed parts of the watercourse.

Ritorno: (traduzione alternativa)
Walk along the dam back to the car.

Coordinate:
Inizio del canyon 46.8513 9.0968
Fine del canyon 46.8366 9.0997

Great canyon. At the beginning some ice on the rocks, after a short time no more.at the high wall the intermediate stand after the 55m is relatively far left out of the water. At the C40 +C40 you can rappel on the left in the dry - belays are available. (traduzione alternativa)

Automatisch importiert von Descente-Canyon.com für Canyon Aua dil Mer Le début de la marche d'approche dans la forêt défonce!1h45 jusqu'au départ du 2è tronçon.Débit correct a 11h puis c'est monté.Ras dans le tronçon 2.Attention dans la C40 au début du tronçon 3, une fissure située 4m sous le relais coince le matériel. Avons remis la plaquette qui n'était plus là 20m plus bas.Grande cascade magnifique, C30 rg puis C70 rg d'un coup jusqu'à 1 terrasse (pas vu de frac à -55...)Ensuite ajout d'un point en rg.Dans l'enchainement suivant, on ne s'est pas engagé dans la première C40, gros mouvement d'eau dans la vasque suspendue, pas pied, siphon en sortie de vasque, drossage à droite!Descente au sec rive gauche sur le monopoint pour tomber direct sur la chaine du 40m suivant.Puis échap rive droite. (Quelle: https://www.descente-canyon.com/canyoning/canyon-debit/23550/observations.html)

Water level good All anchors OK An additional anchor could be placed at the very bottom on the opposite side to make it easier to pull off the last rope length. (traduzione alternativa)
