Gear:

Summary: (machine translated)
In the zone of Cortes de Pallás, between this population and Otonel, in the stupendous cuttings on the river Júcar we have a ravine of "recent" opening by the club Tracalet. It is a generally dry canyon, with the only contribution of the strong Pariderilla that infiltrates shortly after birth, beautiful rappels, some of them in flown and views over the reservoir Naranjero.
As bad part the quantity of vegetation and the hardness of the return.

Hydrology:

Access: (machine translated)
Between Cortes de Pallás and Millares, on the Otonel road.
After 8km, with the mountains and the reservoir on our left, we will have a right turn with a forest track on the right (fenced) and a place to park.

Approach: (machine translated)
We pass the fence and continue along the track for almost a kilometer, towards the source of the Pariderilla, until a right turn, here we will find a milestone and as a reference we will have to go down the hill that delimits the bed of the stream left of the main one. Before arriving at the rocky crest we will throw us to the left to enter the dry tributary. Soon the first rappels

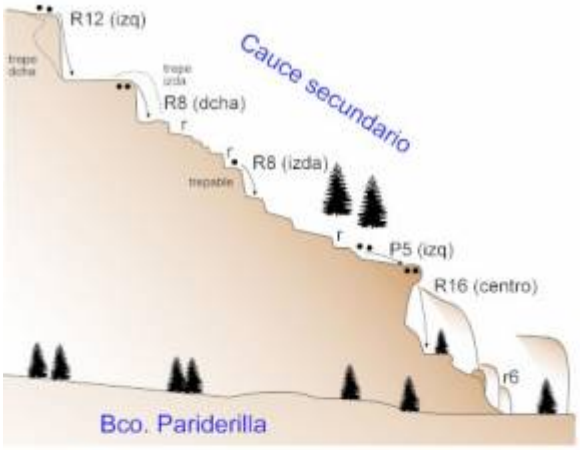

Tour: (machine translated)
See mole

Return: (machine translated)
After reaching the beach of the Naranjero reservoir, we will see a small path on our left ascending. We will go up it following the milestones (it is better to carry a GPS to avoid getting lost on the way up).
