Country: Schweiz / Switzerland **Region:** Kanton St. Gallen **Subregion:** Wahlkreis Sarganserland **Town:** Flums		
Difficulty: not as difficult	**Grading:** v3 a2 II	**Total time:** 3h10
Approachtime: 5min	**Tourtime:** 3h	**Returntime:** 5min
Altitude entry: 730m	**Altitude exit:** 480m	**Delta Altitude:** 250m
Canyon length: 0m	**Highest rapell:** 40m	**Amount rapells:**
Transport: Car optional	**Rock type:**	**Drainage area:** km²
Season:	**Orientation:** Northeast	**Best Time:**
Rating: ☆ 1.9 (2)	**Info:** ★ 1 (2)	**Belay:** ★ 1 (1)

Specialities:

Gear:

Summary: (machine translated)
Interesting non-difficult canyon with a few rappels.

Hydrology:

Access: (machine translated)
We leave the A3 (Sargans-Zurich) via exit 49, Flums and drive straight on through Flums until we reach the large factory building on the left at the end of the village (Spinnerei Spörri). Here we find parking facilities on both sides of the mountain road.\n\once we have parked one car here for the exit, we take the second car off the mountain road to the right onto Kleinbergstraße and up to the hamlet of Portels. After the houses of Portels we take a left, then a right serpentine. Before the next left serpentine we can park our car on the right for the access (see approach and implementation in photo gallery).

Approach: (machine translated)
At the next left turn we take the forest path to the right in the direction of "Frohe Aussicht". Cross the first meadow and on the second meadow turn right to the stream (entry - see access in photo gallery).

Tour: (machine translated)
First we overcome a boulder barrier and then walk in initially open streambed, until the stream narrows. Only a few rappels, plus downclimb in an impressive canyon in red porphyry. Exit at the road bridge to the right.

Return: (machine translated)
A few meters to the lower car.

Coordinates:
Canyon Start 47.0798 9.3259
Canyon End 47.0885 9.3393
Parking at Entry 47.0817 9.3302
Parking at Exit 47.0887 9.3411

Automatisch importiert von Descente-Canyon.com für Canyon Schilstobel Im Schilstobel kann man ja richtig Canyoning machen – das hätten wir aufgrund der bisherigen Einträge (und Informationen aus dem Umfeld) nicht gedacht! Das Seil haben wir sicher 12-15 Mal benutzt – an Haken und improvisiert an Holz und Klemmblöcken. Beim oberen Damm braucht man nicht über die ramponierte Leiter zu gehen, RD gibt es einen Haken. Auch beim zweiten Damm findet man den Haken RD auf dem Felsen. Wunderschön sind der engere Abschnitt im oberen Teil und die eindrückliche Doppelstufe im unteren Teil. Sehr griffig zu gehen, schönes, rotes Gestein. Wir hatten gemäss Hydrodaten ca. 0,550 m3/s Durchsatz. Zu zweit gemütlich in 4 Stunden.Eine abenteuerliche Tour, Bohrutensilien mitzuführen, schadet sicher nicht.Das obere Auto haben wir nach dem Rechtsabzweiger in Portels bei der zweiten Lichtung rechts parkiert. Dort die Wiese rechterhand halb absteigen und dann rechts in den Wald und weiter nach unten zum Bach absteigen. At the left-hand switchback near the last houses in Portels, turn right onto the forest trail toward the entry. After about 300 meters, the forest opens up a second time. Park there on the right, at the edge of the meadow. Head down this meadow, then turn right into the forest toward the entry. First anchor on the right on the front wall near the debris barrier. At least 12 to 15 rappellers. Only a few anchors. Lots of improvising using the abundant wood and clamping blocks. Drilling equipment recommended for emergencies. Lots of varied downclimbing in an impressive canyon with beautiful (often red) rock. The short first narrow section is especially beautiful, and there are two impressive rappels toward the end. The entire canyon offers excellent grip today. Flow rate: According to hydrodaten.sg.ch, the flow rate was 0.57 m³/sec, or approximately 570 liters/sec. Flow rate correct. If it were better equipped, this would be a very rewarding canyon for us. (machine translated)

2025-09-22 | Wolfgang Streicher | |🕮 ★ |⚓ | 〰 Low | 👎 Not done
We parked the car directly above the access (directly at the 1st rest bench on the right of the gravel road). Steep and slippery descent down into the streambed. Entry above the slide brake. Climb down the slide brake on iron bars (approx. 10m). This is followed by a blocked passage. The ascent is aborted due to time constraints. (machine translated)
