Rating: ☆ 3.4 (14)	**Info:** ★ 2.8 (7)	**Belay:** ★ 2.7 (10)
Specialities:		

Gear:
Ropes: 1x40 (2x20)

Summary: (machine translated)
A discontinuous but beautiful lime canyon; clean, cold water; well-equipped; short access; 2 entry points; several emergency exit options in the upper section, becoming more difficult toward the bottom; possible rockfall from the hiking trail; Most sunlight in the afternoon; several small tributaries; some tree trunks; be careful when jumping or sliding due to shallow areas; information available from “Outdoorfriends” (Roland Hatzenbichler).

Hydrology:

Access: (machine translated)
From Sbg.-Süd take the Westautobahn to Mondsee. Follow the main road (Romantikstraße) in the direction of St. Gilgen. After the village of Scharfling, turn left towards Unterach. Through the tunnel and always along Mondsee (L217) to the next junction. Turn right here towards Unterach am Attersee (B151). After approx. 2km, turn right towards Burgau/Weißenbach am Attersee (B152). Follow the road alongside the Attersee to the former Jägerwirt inn (approx. 2.5 km). Get a parking space for €5 from the vending machine (= bottle of mineral water and parking ticket €5). If full or closed, follow the road and look for a parking space on the shore

Approach: (machine translated)
From the parking lot (480m) next to the Jägerwirt, follow the hiking signs behind the inn, marked "zur Bruggrabenklamm" or "zur Eisenau" (trail 26). At the height of the statue of St. Mary, the water level can be checked at the exit at approx. 500m. Then follow the hiking trail orographically left next to the canyon for approx. 20 minutes up to the 1st entry point after the iron bridge that leads over the stream (approx. 610m). For the upper entry, follow the path over 2 wooden bridges and past the Magdalenenquelle (fountain). After a short time you will come to a signpost. Follow path 26 right towards Eisenau. After the wooden footbridge, the trail climbs again briefly to a small wooden bridge. This is the upper entry point (approx. 670m & approx. 40min)

Tour: (machine translated)
Shortly after the upper entry at approx. 670m there is a small slide and a 10m abseil in the water course. This is followed by a downclimb and walking passages with a short narrow part. After a while there is another 10m abseil and then a 15m abseil in the water course. This is followed by several beautiful small pools, washouts and a walking passage to the iron bridge (lower entry). The 2nd section is often used commercially and is therefore well equipped. From the bridge there is another walk and downclimb before you reach the first larger step. Here you can usually descend using fixed ropes. Even at higher water levels, there are often opportunities to rappel outside the water flow, but the canyon should not be underestimated, as the narrow sections in particular can be very dangerous. The highlight towards the exit is a beautiful 20m waterfall. Here you have the option to rappel left in the water or right out of the water. The best way to reach the belay is via a traverese rope (anchors for the cable car are also available below!). Then you are in the middle of high gorge walls. A few smaller steps (and a 3m jump) follow until the exit at approx. 500m

Return: (machine translated)
On the left side of the stream, follow the hiking trail to the parking lot.

Coordinates:
Canyon Start 47.7819 13.4836
Parking Entry and Exit 47.7896 13.4944
Canyon End 47.7884 13.4938

It’s worth taking the hiking trail in the middle section instead of scrambling. We couldn’t find the siphon. Most of the fixed ropes are in good condition. It would be a shame to skip the suspension bridge if there’s a rope there. (machine translated)

Very sunny starting at 2 p.m.—combined with Altersbach, it made for a great day of canyoning! Some of the fixed ropes were a bit shoddy, but otherwise everything was OK! (machine translated)

Got on at the top—it's always a great VM tour—everything's fine (machine translated)

2026-06-07 | Florian Heufler | ☆ ☆ ☆ ☆ |🕮 ★ ★ ★ |⚓ ★ ★ ★ | Low | Completed
The siphon is no longer present in the upper section Between C20 and S5, there is a large, freshly fallen tree blocking a narrow section, but it can be easily climbed over. Otherwise, everything is great (machine translated)

Nice canyon. Anchoring in some places could be better. (machine translated)

2026-05-24 | Georg Rudelstorfer | ☆ ☆ ☆ ☆ |🕮 ★ ★ ★ |⚓ ★ ★ ★ | Normal | Completed
All stands in order. Only very few jumps possible many gravelled pools (machine translated)

2025-08-25 | Wolfgang | ☆ ☆ ☆ ½ |🕮 |⚓ | Normal | Completed
As usual, we started from the top; there is still a lot of water in it; like last year, the stone is very grippy and not slippery at all. The upper part is very nice in the sun. The two jumps were possible today with caution. It was a lot of fun again (machine translated)

2025-07-11 | Erik Veistrup | |🕮 |⚓ | Normal | Completed
Unfortunately, it was all sanded up after a heavy thunderstorm in June. No jumps and only the lowest 3 slides are conditionally possible. We hope for improvement (machine translated)

2024-11-01 | Wolfgang | ☆ ☆ ☆ ½ |🕮 |⚓ ★ ★ ★ | Normal | Completed
Climbed from above. All anchors ok, jumps possible in the lower part (machine translated)

2024-09-06 | Giga | ☆ ☆ ½ |🕮 ★ ★ ★ |⚓ ★ ★ ★ | Normal | Completed
Some pools are covered with gravel. Anchors partly well hidden/ingrown. (machine translated)

Walked from "above" again for a long time. I don't remember the tour being that nice; ideal if you don't have that much time on a sunny day. Great clear pools,... slides, jumps,...everything is possible at the moment and not at all slippery (machine translated)

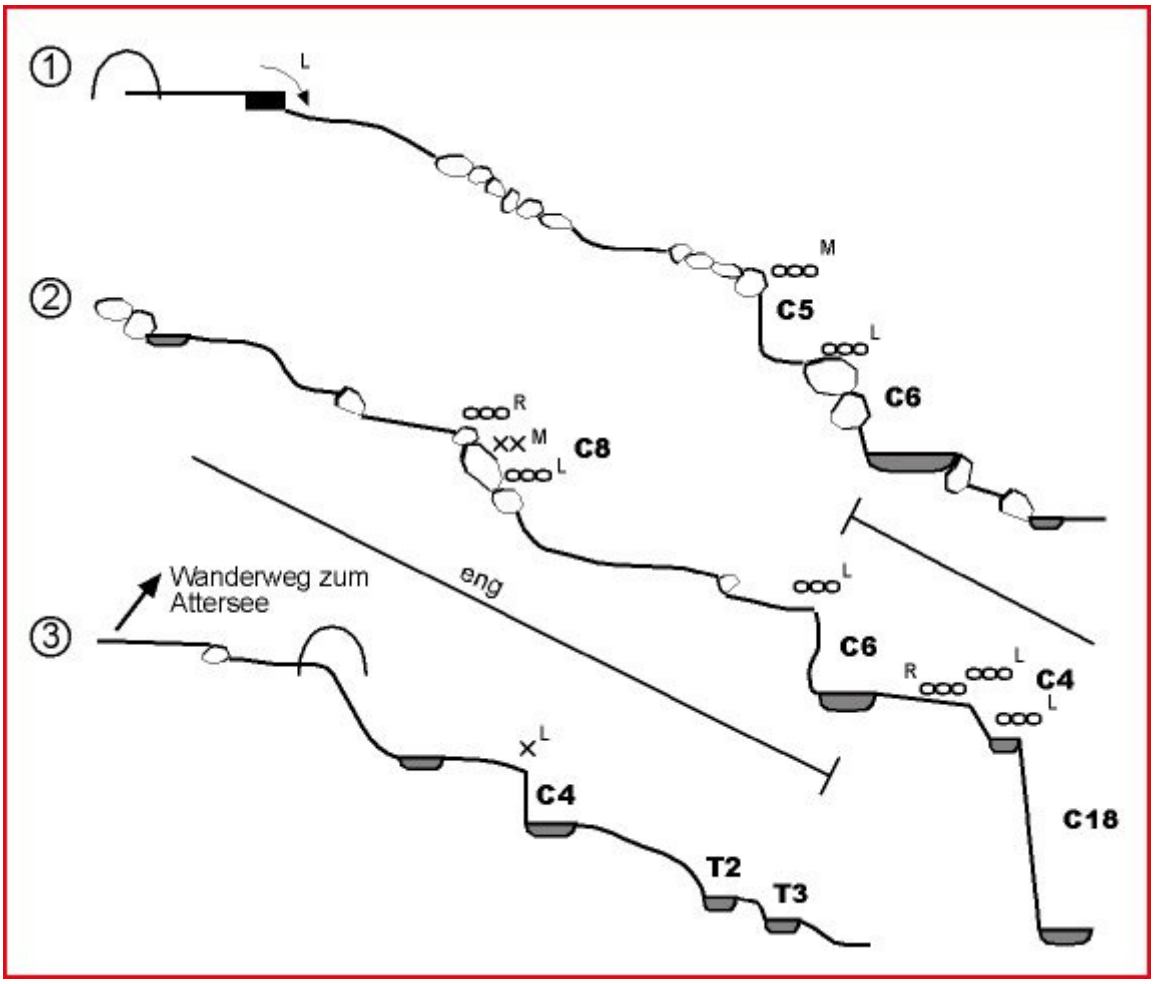

2023-06-25 | Kevin Sindberg | ☆ ☆ ☆ ☆ |🕮 ★ ★ ★ |⚓ ★ ★ ★ | Low | Completed
Beautiful gorge, which is in good condition because of / thanks to the also commercial walks. Good protection, rappelling is possible both in and next to the stream. (machine translated)
