Gear:

Summary: (machine translated)
Open with fattened stretches, generally dry but after rains it gains a lot.

Hydrology:

Access: (machine translated)
From Mas de Barberáns to Roquetes by the TV3421, in the pk 18,6 we have a detour to the Barranc de Lloret. At the end of this track there is a barrier, there is a place to park.

Approach: (machine translated)
Approach to Bcos Lloret and Clot de l'Hospital
We will continue along the same track that towards the southwest goes up to the Font del divendres and Mas del Cansalader. We will pass a gate and after a couple of bends we will leave the track to go to the right on a path that climbs to the Coll Ventós (at the height of the fountain and a water tank).
Arriving at the pass we will find a track again, after 250m there is a track on the right, it is the most comfortable place to access Lloret or return if we do not want to do Lloret.
We continue straight ahead along the track towards the Coll de Lloret, after almost 2kms from the Coll Ventós we will arrive at the Font del Sapo and in a sharp left curve we turn right to the riverbed.

Tour: (machine translated)
Fairly open with more channeled areas as we advance in the ravine.

Return: (machine translated)
After reaching the confluence with the Bco Orio we follow it and soon we find the access to Lloret where we can return. Another option is to continue and do the Bco Lloret.
