Canyon length: 2700m	**Highest rapell:** 27m	**Amount rapells:** 27
Transport: Car optional	**Rock type:** limestone	**Drainage area:** km²
Season:	**Orientation:** South	**Best Time:**
Rating: ☆ 3.5 (6)	**Info:** ★ 3 (1)	**Belay:** ★ 2.5 (4)

Specialities:

Gear:
Ropes: 2x30m

Summary: (machine translated)
Rappel canyon with walking passages, mostly without water flow in the gorge area. Continuous water flow can be expected at the beginning of the year until around March/April.

Hydrology:

Access: (machine translated)
Shuttle displayed. One car down at Kaputas beach between Kas and Kalkan. The second car above Kalkan on road 07-53 towards Elmali. After 6.1 km from Kalkan, past a fountain on the right-hand side of the road, park your car in an open space at the side of the road and above the river.
For the transfer route (13.5 km)see http://www.wikiloc.com/wikiloc/view.do?id=13938225

Approach: (machine translated)
From the fountain on the right, initially descend without a path, tending to head out of the valley. You then come to a path which you follow downwards until it finally winds down into the river bed (near a pipeline which crosses the river here).

Tour: (machine translated)
First in the open riverbed, which usually still has water at the beginning. After just a few minutes, the water seeps into the ground and the descent continues - apart from a small but deep pool that can be climbed around - in the dry. Only after a walk of around 1.5 hours and a few passages for downclimbing do we come across the first compelling rappel. The canyon becomes more and more notchy and becomes more and more attractive.
There are 27 rappels to complete. They are listed in detail at
http://www.wikiloc.com/wikiloc/view.do?id=13937747.

Return: (machine translated)
After the attractive 27th and last rappel (27m), we walk a few minutes further, climb over the wall of a water drainage (under the road bridge) and come to Kaputas beach, which invites you to swim directly after the dry gorge. We then walk up the steps to the road and back to the car.

Coordinates:
Canyon Start 36.2439 29.4658
Canyon End 36.2304 29.4495
Parking at Entry 36.2464 29.4667
Parking at Exit 36.2293 29.4495

Beautiful canyon, with narrow passages. All stands tip top with canyon beer on the beach at the exit. It took us 3 hours to descend from the fountain to the exit. (machine translated)

Still a nice water level ◫ (machine translated)

2026-04-07 | System User | |🕮 |⚓ | 〰 High | 👍 Completed
Automatisch importiert von Descente-Canyon.com für Canyon Kaputas For us very nice waterflow for a dry-canyon.Most abseils are our of the water, a few you have to abseil in the streem.We took a taxi for the shuttle. Price between 20-30Euro bookable in Kalkan.The first part 45-60Min.is boring hiking, with the 8th abseil it becomes nice. (Quelle: https://www.descente-canyon.com/canyoning/canyon-debit/22769/observations.html)

2026-04-07 | Bina | ☆ ☆ ☆ ☆ |🕮 |⚓ ★ ★ ★ | 〰 High | 👍 Completed
Great water level for a dry gorge. We even had to swim briefly once. Many places next to the water rappelable, few where you have to rappel in the stream. At the beginning 45min - 1h stream walk. From the 8th rappel it gets great ◫. Cab for shuttle can be organized in Kalkan. Costs: between 20-30 euros. (machine translated)
