Country: Türkiye / Turkey **Region:** Antalya **Subregion:** Kaş / Kas **Town:** Kalkan

Difficulty: not as difficult

Grading: v3 a2 III

Total time: 5h25

Approachtime: 15min

Tourtime: 5h

Returntime: 10min

Altitude entry: 625m

Altitude exit: 15m

Delta Altitude: 610m

Canyon length: 2700m

Highest rapell: 27m

Amount rapells: 27

Transport: Car optional

Rock type: limestone

drainage area: km²

Season:

Orientation: South

Best Time:

Rating: ★ 3.2 (3)

Info: ★ 0 ()

Belay: ★ 2 (1)

Specialities:

Gear:

Ropes: 2x30m

Summary: (machine translated)

Rappel canyon with walking passages, mostly without water flow in the gorge area. Continuous water flow can be expected at the beginning of the year until around March/April.

Hydrology:

Access: (machine translated)

Shuttle displayed. One car down at Kaputas beach between Kas and Kalkan. The second car above Kalkan on road 07-53 towards Elmalı. After 6.1 km from Kalkan, past a fountain on the right-hand side of the road, park your car in an open space at the side of the road and above the river.

For the transfer route (13.5 km)see <http://www.wikiloc.com/wikiloc/view.do?id=13938225>

Approach: (machine translated)

From the road, initially without a path down to the river, we come across a path running parallel to the slope. Follow this downhill above the river until it finally winds down into the river bed (near a pipeline that crosses the river here).

Tour: (machine translated)

First in the open riverbed, which usually still has water at the beginning. After just a few minutes, the water seeps into the ground and the descent continues - apart from a small but deep pool that can be climbed around - in the dry. Only after a walk of around 1.5 hours and a few passages for downclimbing do we come across the first compelling rappel. The canyon becomes more and more notchy and becomes more and more attractive. There are 27 rappels to complete. They are listed in detail at <http://www.wikiloc.com/wikiloc/view.do?id=13937747>.

Return: (machine translated)

After the attractive 27th and last rappel (27m), we walk a few minutes further, climb over the wall of a water drainage (under the road bridge) and come to Kaputas beach, which invites you to swim directly after the dry gorge. We then walk up the steps to the road and back to the car.
