Specialities:

Gear:

Summary: (machine translated)
Nice descent with tuff formations (be careful), relatively easy and with a 35m waterfall worth enjoying. Natural anchorages and slippery descent, so be careful!

Hydrology:

Access: (machine translated)
From Orozko (Zubiaur) we take the BI3513 (Ibarra, Artea) to Gorbea Park. We continue to Gallartu where we will leave the return car if we have it.
From here we take the detour by the paved road that goes up to the park, after about 2kms we have a parking lot for the access car.

Approach: (machine translated)
We go back along the road for 250m to a track that leads us to the bed of our ravine.

Tour: (machine translated)
The first rappels are very short, from natural, with good formations in the middle of a beautiful forest to reach the waterfall that gives its name to our descent. Magnificent waterfall in which to delight us.
We will follow the riverbed now with less difficulties, we will leave a creek to the right, a couple of abseilings and the ravine opens up.

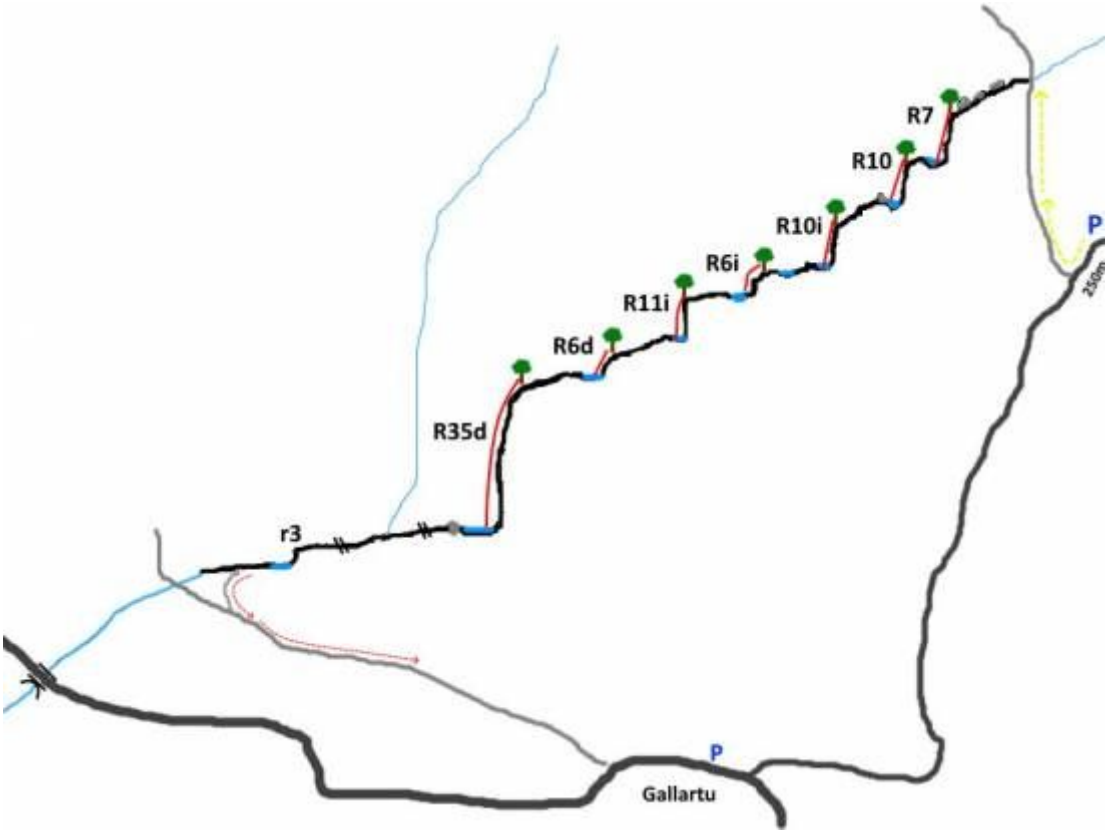

Return: (machine translated)
Once the ravine opens, we will see a path on the orographic left that will lead us to a track, we will take it to the left and in 10 minutes we will be in Gallartu.
