**Specialities:**

**Gear:**

**Summary:** (machine translated)

Very interesting descent to combine with Silán (2kms away). With the right flow it is an entertaining and fun descent but be careful, this canyon can get very strong.

**Hydrology:**

**Access:** (machine translated)

We must be located in the church of Silán (Rego de Silán).

We can go by the AG-64 and take exit 43 to LU540 Viveiro. At PK27 we have the detour to the right to Viveiró, where we will go and once there we turn off to Candéal by the CP6502. This road takes us to the church. We will have it on the left and on the right an esplanade where to park (parking area for the Rego de Silán).

We will follow the road for almost 2 kms and we will see the detour to the right to Vilariño, we will pass it and the bridge over the river. After about 100m we have a track on the left and a cross on the right. We park here.

**Approach:** (machine translated)

We go back a few meters and see a path that goes down to the river.

**Tour:** (machine translated)

Beautiful, aesthetic, well-shaped and better installed descent. With medium flows it is a marvel, with high flows it can be a problem. It has some beautiful 5+10 chained rappels.

**Return:** (machine translated)

After the 4m jump we will see a milestone/mark/boulder on the right that indicates a trail to go up. This trail takes us to where we have parked.

**Coordinates:**

Canyon Start [43.5286 -7.5860](#)
