Real slippery, strong flow and exposed abseils. A new tree in the upper pool where you could jump. 2 additional anchors were placed (well-protected) to access the big drops (each of them with double anchor). Loose and falling rock in the big waterfalls, best not to stay below or have your rope dangling where you cannot see it. We opened the lowest waterfall to complete the tour with one anchor on the right. Short tour to complement a stay in the valley.
