**Summary:** (machine translated)

Alpine and watery rappel canyon.

**Hydrology:**

**Access:** (machine translated)

We leave the A12 (Sargans-Chur) via the Bad Ragaz exit, drive through the center of Ragaz up to Pfäfers and into the Val Tamina. Passing the reservoir we reach the village of Vättis. Here we turn right and drive westwards into the Calfeisen valley and towards St. Martin to the Gigerwald reservoir. 4,2 km after the village center of Vättis and passing the restaurant Gigerwald we come to a left serpentine (about 700m before reaching the Suaumauerkrone). Here we park our car.

**Approach:** (machine translated)

Here we take the mountain path (blue-white marking) towards Pizol (2844m) and the alp of the same name, which goes up the orographic. right slope of the Tersolbach. At 1380m we pass the water diversion where we will get off after the descent. Here we can judge the water flow in the Tersol. After a good hour we come to an open high valley above the gorge and here we enter the stream.

**Tour:** (machine translated)

There are about 25 rappel ahead of us. Partly in the stream of a mostly decent water flow, but without slides and possible jumps. After the canyon opens, we come to the water drainage, where we exit to the right onto the approach trail.

**Return:** (machine translated)

Down the ascent path to the car.

Tersol inf inferiore from the socket. Very rewarding with little water. Down to the Tamina. Discovered 4 very beautiful waterfalls. (machine translated)
