<b>Summary:</b> (machine translated) Small catchment area; can be combined well with Rio Pliz (recommendation: first Rio Pliz then Rio Malimberg); several rappelling points up to 20m; nice single points; clean water, short access		
<b>Hydrology:</b>		
<b>Access:</b> (machine translated) From Hotel Carnia take the SS13 in the direction of Tarvisio. At the exit of Chiusaforte turn right towards "Sella Nevea"/Raccolana. Follow this road straight on, go through the avalanche gallery and continue straight on. About 4 km after the avalanche gallery you will reach the village of "Saletto". Here you turn left (over the bridge) towards "Chiout Cali". At the entrance of the village you cross "Rio Malimberg". Immediately after the bridge park on the right (next to the power house).		
<b>Approach:</b> (machine translated) At the power house after the bridge you can already see the hiking mark 641 (Attention: in the Tabacco map the hiking trail is already marked before the bridge. But this is wrong!) Immediately after the power house you follow the access road up to the 1st house. The path goes between the houses until you reach asphalt again. Here turn right in the direction of the electricity pylons, where there is again a trail marker 641. From here, follow path 641 until you reach the wooden bridge that crosses the Rio Malimberg. Attention, just after the bridge an inconspicuous steep path goes up on the left. With a quick gain in altitude (on the orographic left side of the gorge) you will soon be at the entry, at 690Hm.		
<b>Tour:</b> (machine translated) The Rio Malimberg inferiore is a beautiful, short, technically not too difficult tour, which definitely has a lot to offer. Due to the characteristics, the canyon is also suitable for beginners, but also has enough potential for experienced canyoneers. Most of the rappels are easy to see and the pools are not deep. Some rappels are in the watercourse and provide refreshment. The canyon is very continuous from start to exit, with only short walking passages. At the wooden bridge you have the possibility to get off on path 641. However, the further descent pays off in any case (disturbing here is only a water drainage, which suddenly disappears in the field).		
<b>Return:</b> (machine translated) At approx. 570Hm before the road bridge, get off on the right to the parking lot/power house.

Again used as an alternative stream as Favarinis and Pissanda still had a little too much water. (machine translated)

Inserted as an afternoon tour in the rain. Quite a lot of wumps if you catch the stream but you can usually go right/left/under it. Still possible with more water than we had. (machine translated)

Super nice canyon, short, easy, but still with some technical challenges. I would definitely rate it more than 2,5 📖  
One anchor point number 3 is a little broken, but still OK. You can see on photo

All good, short, but sweet.

Everything tip top. We left a piece of rope hanging, because a stand in the wet had to be climbed a bit tricky. On the last rappel (SOS1) rappel over both waterfalls. (machine translated)
