Rating: ☆ 3.8 (18)	**Info:** ★ 2.9 (11)	**Belay:** ★ 2 (16)
Specialities:		

Gear:
Ropes: 2x30m

Summary: (machine translated)
Short, but crisp: 2 waterfalls and an inclined slide, with smaller steps in between for jumping or sliding. Generally plenty of water flow.

Hydrology: (machine translated)
High water flow, which—even on gentle inclines—can lead to life-threatening backflows or flash floods for canyoners!
The canyon can be navigated only up to a maximum flow rate of 1.3 m³/s.

Access: (machine translated)
Leave the Inntalautobahn A93 (Rosenheim-Kufstein) at the Oberaudorf exit (about 5 km before the German-Austrian border at Kufstein) and drive into the village of Oberaudorf. In the village, first take the St2089 in a westerly direction, then the road bends to the north. Continue north on Rosenheimerstraße (St2089) for 150m, then turn left onto Bad-Trißl-Straße in the direction of Tatzelwurm, Sudelfeld, Bayrischzell. After a further 2.1 km we come to Tatzelwurmstraße in the hamlet of Fischbach. Turn left here and continue for another 6.4 km on a winding, narrow road past the "Feuriger Tatzelwurm" hotel. Take the left fork ("Sudelfeld") and after approx. 200m turn left into an inconspicuous driveway (yellow signs) to the large hikers' parking lot (2023: 3€/day). Park your car here. You should not take the lower parking lot and walk to the car in the streambed, as this leads through the hotel grounds and private property and always causes problems for local residents.

There are also checks to see if the parking fee has been paid, so it's better to pay!

Approach: (machine translated)
The entry is only 2 minutes below the hikers' parking lot and is reached via the gravel path. The water level can be checked from the upper bridge, which runs directly above the uppermost pool.

Tour: (machine translated)
At the first rappel you have a choice: either right (climbing a little upwards) next to the watercourse or left in the lower part of the rappel a short piece through the rappel.A small step follows and the next higher rappel, which goes down at the edge of the rappel. At the left edge of the next pool, you can climb up to a jump using iron steps and fixed ropes. After the next step follows an inclined rope, where the beam cannot be avoided. Supposedly, slides are also possible here (not verified). Watch out for the backsuck at the exit.

Return: (machine translated)
After the last rappel in the streambed only about 20m further down, and still before the dam left through the forest over a steep inconspicuous path on the hiking trail to the lower bridge (5 min). Here turn right to the large hiking trail above the hotel, which leads us in 5 min past the upper bridge back to the parking lot. You should not continue in the streambed, as this leads through the hotel complex and private land and there are always problems with residents.

Coordinates:

Automatisch importiert von Descente-Canyon.com für Canyon Tatzelwurm Superbe canyon qui mérite un détour. Les cascades doivent être : c20 (équipement hors d eau en rd et monopoint en rg qui fait passer dans le débit , c5(passe en tob), c25 (pareil peut se faire en toboggan à mon avis immense, peut être même en full toboggan ????), une via ferrata au pied pour faire des sauts jusqu a 10m, passerelle en bois HS au dessus, puis c20 avec relais moisi, dans la dernière vasque une passerelle pour saut de 12 m en rg. Bref un superbe aqualand très continu et a 2 pas de la voiture. Quelques autres remarques plus générales : route payante à 4€ et parking à 3€, bien payer car la police rode et fait casquer. En bas de la route a l est une superbe zone de jeu pour enfants avec un pan d escalade incroyable. Enjoy aux suivants et merci beaucoup Wolfgang stretcher (Quelle: https://www.descente-canyon.com/canyoning/canyon-debit/22102/observations.html)

Normal water level at the entry. The topographic view shown is incorrect in terms of elevation. A new topographic view will follow. The first rapper needs about 17–18 m of rope. The second rapper needs 25 m; a 50-meter rope is just enough. The final rappel can be tricky when the water level is high due to the arrival pool. You might get washed through a bit by the backflow here. Otherwise, it’s a really beautiful stream. Highly recommended! (machine translated)

An absolutely dreamy canyon. The perfect evening hike. I’ll replace the ropes next Monday. They’ll need replacing again by spring 2028 at the latest. The anchor/hook at the second rappeller’s belay station will probably need replacing next spring. I’d be happy if someone who’s better at this than I am could take care of that. (Both photos show the second rapper) When accessing the second belay station, you should use a long self-belay or have your partner hold you back. (machine translated)

Quick check: all rope traverses are at their limit. Anchors are okay. (machine translated)

2026-05-24 | Yorick van Noord | ☆ ☆ ☆ ☆ |🕮 ★ ★ ★ |⚓ ★ | 〰 Normal | 👍 Completed
Water level good. Anchors very variable but okay. Fixed ropes in poor condition. Very short but fun canyon (machine translated)

An extra star as a winter canyon. Great ice formations, all stands easily accessible despite icing. (machine translated)

Climbed in the afternoon together with Gitti and Arthur. At the first rappel on the right, two bolts are sticking out of the unfinished rope protector, slightly damaging the rope. Water level for ascent basically OK. At the last pool we circled. (machine translated)

2025-03-23 | Bavarian Canyoning | |🕮 |⚓ | 〰 Normal | 👎 Not done
A second rope traverse was added to the upper one, as the old one was getting on in years. In addition, the hanging rope in front of the last rappel was also replaced. (machine translated)

2024-09-01 | Bavarian Canyoning | ☆ ☆ ☆ ½ |🕮 |⚓ ★ ★ | 〰 Normal | 👍 Completed
All anchors largely in order, except for the last waterfall. Some new expansion bolts have been placed in the upper basin before descending to the actual belay. There are three single pitons at the lower belay, which are connected by a rope. (see picture) All the pools were very deep, except for the one at the first rappel. This is at maximum chest depth and not suitable for jumping. The lower wooden bridge is very rotten and should not be started under any circumstances! The rock was unfortunately quite slippery. (machine translated)
