Rating: ☆ 3.8 (28)	**Info:** ★ 2.6 (23)	**Belay:** ★ 2.8 (26)

Specialities:

Gear:
Ropes: 1x40m

Summary: (machine translated)
Beautiful short aquatic lime canyon; some jumping and slides; fresh clean water; southwest exposure; can be combined with Rio Lomming.

Hydrology:

Access: (machine translated)
The village of Resuitta lies between Chiusaforte and Carnia. From here you drive into the beautiful Resia Valley. Follow the road signposted "Stolvizza" and "Coritis". After the village of Stolvizza, the road first leads downhill. You cross the T. Resia (follow the signs for "Coritis"). The road then climbs up some narrow hairpin bends to a chapel. From here, the road leads slightly downhill again. After approx. 2.2 km from the chapel, you cross two small road bridges (R. Slatina and T. Resia) in quick succession. Immediately after the second bridge, follow the forest road left downhill for 400m to the very back of the trail (Caution! You cross 2 stream crossings and therefore need some ground clearance). At the end (after the 2nd crossing) the forest road bends to the right. You can either park your car here or follow the forest road uphill for approx. 100m and park your car directly at the hiking trail signpost 657 (entry/exit parking lot).
(P.s. It is 9km from the sign at the end of Resiutta to Stolvizza and 4.4km from Stolvizza to the two small bridges).

Approach: (machine translated)
From the parking lot right next to trail sign 657 (“Birio Sant,” “Sella Grubia”), follow the trail on the orographic right side of the stream. At the wooden sign with a picture of a bird, the trail leads uphill. Follow this trail for about 140 meters in elevation gain until an inconspicuous path branches off to the right (the main trail continues to the left; to the right is a dry streambed). Follow the path alongside the gorge to a gravel slope (2 blue dots). Then follow/descend the steep gravel slope, marked by red dots, down into the streambed. Entry at approx. 670 m.

Tour: (machine translated)
The access is not easy and rather long in relation to the tour. Nevertheless, the Rio Ronc is a worthwhile canyon. Especially those who like to slide and jump will get their money's worth. After a short section of walking, the first 2 abseiling points are reached; 3m and 20m. The 20m step is also the highest point. Most of the following steps can be slid or jumped, depending on the water level. Between the steps, there are always short walking passages with beautiful washouts. The tour exits at the access path at approx. 600m.

Return: (machine translated)
Climb out of the stream to the right onto the access path and shortly back to the parking lot.

Coordinates:
Canyon Start 46.3569 13.3937
Parking Entry and Exit 46.3520 13.3881
Canyon End 46.3524 13.3911

We jumped everything we could. Perfect as the second route of the day. The climb took 25 minutes, the canyon 1 hour, and we did a couple of jumps twice. (machine translated)

Everything tip top. (machine translated)

2026-07-22 | Robert Werner | ☆ ☆ ☆ | 🕮 | ⚓ ★ ★ ★ | | 👍 Completed
The route description mentions red dots, but the two are blue. There’s a great rope traverse. Fun jumps. Beautiful Italian mountain road. (machine translated)

2026-07-19 | Montie | ☆ ☆ ☆ ☆ | 🕮 | ⚓ ★ ★ ★ | ≋ Low | 👍 Completed
Everything is perfect, pools are more than deep enough for all the normal jumps and slides, anchors are in good condition. Always a treat.

Water levels are low for this time of year; all the jumps are doable, though some are a bit shallower. But as always, it's an awesome canyon—just a short one. (machine translated)

Unfortunately, all the pools are filled. There is not a single jump in them. But there have been such before. Let's hope it will be cleaned up next year. Water was average
