Summary: (machine translated) Beautiful short aquatic lime canyon; some jumping and slides; fresh clean water; southwest exposure; can be combined with Rio Lomming.		
Hydrology:		
Access: (machine translated) about 30min. Between Chiusaforte and Carnia is the village of Resiutta. From here you drive into the beautiful Resia Valley. Follow the road with the signs "Stolvizza" and "Coritis". After the village of Stolvizza, the road first goes down. One crosses the T. Resia (follow the signs "Coritis"). Then there are some narrow serpentines uphill until you reach a chapel. From here the road goes slightly downhill again. From the chapel, after about 2.2 km, you will cross two small road bridges (R. Slatina and T. Resia). Here, immediately after the second bridge, follow the forest road on the left downhill for 400m to the very back (Attention! One crosses 2 stream crossings and therefore needs some ground clearance!). At the end (after the 2nd crossing) the forest road makes a right turn. Either park the car here or follow the forest road upwards for about 100m and park the car directly at the hiking trail sign 657 (entry/exit parking exit). (P.s. From the sign at the end of Resiutta to Stolvizza it is 9 km and from Stolvizza to the two small bridges it is 4.4 km).		
Approach: (machine translated) about 30-40min. From the parking lot, directly at the hiking sign 657 ("Birio Sant", "Sella Grubia"), follow the orographic path to the right of the stream. At the wooden board with the bird on it, the path goes up. Follow it for about 140m until an inconspicuous path branches off to the right (marked path goes to the left. On the right is a dry streambed). Follow the path next to the gorge until you reach a gravel slope (2 red dots). Then follow/descend the steep gravel slope via red dots to the streambed. Entry at approx. 670m.		
Tour: (machine translated) about 1,5h The access is not easy and rather long in relation to the tour. Nevertheless, the Rio Ronc is a worthwhile canyons. Especially those who like to slide and jump will get their money's worth. After a short walking section come the first 2 abseils; 3m and 20m. The 20m step is also the highest point. Most of the following steps can be slid or jumped, depending on the water level. Between the steps there are always short walking passages with nice washouts. The tour ends at the access path at about 600m.		
Return: (machine translated) About 5min Climb right out of the creek onto the access path and shortly back to the parking lot.

Automatisch importiert von Descente-Canyon.com für Canyon Ronc Good conditions. Deep pools. Jumping opportunities. (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/23462/observations.html>)

There was no 2nd or third abseil point. A jump was not possible as it was too shallow from above. We rappelled down the trapped tree. If it is not there, the ropes can be laid over the entire boulder. Otherwise superiore beautiful and great jumping opportunities. (machine translated)

Rope is only required for the first 2 rappels, otherwise everything can be jumped or slid. All pools are clear.
