**Summary:**
The Jgheabului Valley is located in the Șureanu Mountains and springs from the southeastern part of Pleșa Peak (1050 m). In its steep descent, it has formed 2 narrow sectors with a more vertical profile, flanked by high, steep slopes, with a total of 10 abseils ranging from 3 to 17 meters, where abseiling is required.

These days it is completely dry at the beginning, and hardly flowing in the lower part. Too bad, otherwise it is pretty, and could be fun with water. Rappels are fairly easy (now). The real surprise comes after the exit, just having the wetsuites taken off we had to submerge in the Crivadia gorge that seems to be never out of water.
