Summary: (machine translated) Very beautiful rappel canyon with 2 high abseiling points of approx. 50m; very beautiful panorama; swimming possibility at the Mondsee after the tour; only recommended with small groups and sufficient abseiling experience; exit/entry possible in the middle section; limestone.		
Hydrology:		
Access: (machine translated) approx. 15min From Mondsee take the main road (Romantikstraße) in the direction of St. Gilgen. After the village of Scharfling, turn left towards Unterach. After the tunnel, there is limited parking on the right next to the road or gravel parking in the forest.		
Approach: (machine translated) approx. 50min From the parking lot, follow the hiking trail signposted Eisenau --> you will soon reach the final abseil (check water level) --> continue uphill and cross the stream after approx. 15min (exit/entry point) --> continue uphill here, past the water fountain and a wooden hut to reach the forest road with a fork --> follow the forest road to the right --> at the point where the forest road makes a slight left bend, leave it to the right and continue downhill along the inconspicuous forest path to the stream.		
Tour: (machine translated) approx. 3h After a short stretch in the streambed comes a dilapidated wooden bridge --> then follows a short narrow section with small washouts --> after a short stretch with downclimb passages the canyon opens --> here you have a beautiful view of Lake Mondsee --> over well placed belays it goes over 3. downclimbs from 5m to 20m to the first large 50m waterfall --> to get to the exposed belay on the right should be built for safety's sake a removable rope traverse!> The 50m abseil is only up to the sharp edge in the water, after that you are in the overhang--> Alternatively you can abseil to the left outside the waterfall (intermediate level after approx.20m+30m) --> after the beautiful 50m-waterfall the next steps on the left can be bypassed --> after that there are short rappels which are mostly bypassed --> after further short mostly unproblematic rappels one crosses the hiking trail which one went up before (exit possibility) --> after the hiking trail there are five approx. 20m rappelling routes which follow each other shortly (downclimbing not advisable because mostly very slippery) --> to get to the exposed and mostly very slippery belaystation of the 50m final waterfall a removable rope traverse should be installed again --> the rappelling route looks from above mostly more spectacular than it is, because at the beginning of the rappelling routes you are again briefly in the water flow. (Alternatively, this abseil point can also be divided approx. 20m+30m).		

Return: (machine translated)

approx. 10min

At the bottom follow the trail on the left back to the parking lot.

Very beautiful stream. Great views throughout the tour. Top hooks. Quite good grip. A little drafty in the upper part. (machine translated)

All pegs are numbered and in order. The belaystation for number 13 is opposite the sign with the number. (machine translated)
