**Specialities:**

**Gear:**

Ropes: 2x40

**Summary:** (machine translated)

Very short tour, with 2 rappels and a steel rope bridge, which exits in the Tiroler Ache/Großache. You can either swim to the Klobenstein bay and get out there, or combine the canyon with a rafting/kayaking tour on the Ache.

**Hydrology:** (machine translated)

Normally very little water, but especially during/after rain, the siphon of the spring can overflow and then suddenly a lot to very much water can be expected.

**Access:** (machine translated)

On the road between Schleching (DE) and Kössen (AT) we can park at the hiking parking lot of Klobenstein.

**Approach:** (machine translated)

We first follow the hiking trail down to the Ache. There we cross the suspension bridge and ascend along the well-maintained path. At the junction, we continue left until we reach the viewing platform. After another 100m, we take a poorly recognizable trail into the forest on the right until we reach the stream and the first rappel

**Tour:** (machine translated)

We start with a 7m rappel (expansion bolt, left) and continue climbing down to a "steel rope bridge". After a longer and slippery downclimb, which goes under a wooden bridge of the hiking trail, we come to a rope traverse (steel, right), where there is an approx. 35m rappel (chain anchor expansion, right) at the exit. When pulling off the rappel, the rope often gets caught in a V, which is why it is worth using the chain anchor after approx. 1/3 of the rappel (chain anchor expansion, left). At the exit of the tour, you can get off at the suspension bridge at the Klobenstein bay after a short swim, or take a rafting/kayaking tour on the Ache towards Schleching.

**Return:** (machine translated)

We follow the same hiking trail as for access to the parking lot.
