**Summary:** (machine translated)
Wild forest canyon

**Hydrology:**

**Access:** (machine translated)
A-10 from Voltri (Genoa), exit Arenzano; take the SS-1 west towards Cogoleto, Varazze. After approx. 200 m, Via Giappone branches off to the right towards Terralba.\nIn Terralba, turn left (after a right-hand bend) into Via Pecorara. The road initially heads north, then bends to the west.
Drive through Pianaletta and cross the Rio Lissola. At a junction, turn right uphill (via Checchelli). After a few hundred meters you come to a widening of the road, where the "main road" goes up in a serpentine to the right, but another tarred road leads down to the left. We park the car here. There is quite a pile of junk and tools on the hillside.

**Approach:** (machine translated)
We now follow the road to the left down to some houses (do not take the meadow path that turns right!). Directly below the houses we come to a path running along the slope, which we follow to the right.
After about 20 minutes we come to the Ponte Negrone, which crosses the Rio Leone. Immediately after the bridge, the path turns right (do not go straight ahead!).
After another 15 minutes or so, the path crosses the Cu du Mundu coming down from the left (exit point at about 300 m).
The path continues uphill in several hairpin bends. After an additional 40 minutes, the path branches off (approx. 580 m above sea level). We take the left-hand path and reach the entry point in a few minutes.
Mostly directly on the orographic right bank, a partly exposed trail leads up the canyon.

**Tour:** (machine translated)
Relatively narrow wild forest canyon with some opportunities for jumping. Slippery.

**Return:** (machine translated)
Where the stream crosses the ascent path (see above access).

Automatisch importiert von Descente-Canyon.com für Canyon Cü du Mündu Descente à ne pas prendre à la légère du fait de sa cotation relativement faible. L'enchaînement des rappels est continue et avec ce débit peux poser problème pour des équipes non aguerris. Préférez prendre 2x 40 m pour être serein si vous ne connaissez pas le parcours. Nous avons dû bartasser et éviter le quatrième et cinquième rappels car nous étions trois court pour aller checker les amarrages suivant. Cascades évitable en RG. Avons casser et nettoyer plusieurs troncs mort menaçant... L'équipement est aléatoire. Parfois très correct parfois pas suffisant. Pensez à prendre de quoi rafraîchir tout ça ... Ça glisse dans les rappels, les déviation ne sont pas forcément bien placées ou manquante par endroits. L'enchaînement n'est pas si long mais à prendre avec précaution si vous n'êtes pas aguerris aux techniques d'enchaînement de verticales.
