<b>Summary:</b> (machine translated) Short rapel canyon, continuation of Mesonas (see there). Recommended only in spring. In summer, stagnant water.		
<b>Hydrology:</b>		
<b>Access:</b> (machine translated) From Agios Nikolaos on the so-called New Road (No. 90/E 75) towards Sitia, still passing Pachia Ammos (up to here 19 km). The road to Ierapetra (southwards) turns off to the right. We continue straight ahead (east) towards Sitia and after 5 km we reach Kavousi. We drive through the village and turn right at the last houses and before the bridge (sign 'Archeological Site'). Just before the road starts to climb, we park a car and drive up the concrete road, ignoring the turnoff to the Archeological Site (2.2 km from the E75 turnoff) and passing one of the oldest olive trees in Crete. Then we go downhill a bit and cross a streambed (4.3 km): on the right (south) ends the Mesonas, on the left begins the Havgas. Here we park the other car. Unless we have a second vehicle, you can partly hike up along the water pipe high above the canyon with 'fantastic views' into it. More details in the travel guide Crete by Michael Fohrer, 17th edition, 2007 p. 422: GPS hike 10.		
<b>Approach:</b> (machine translated) From the upper car walk a few meters along the right bank of the streambed until a walk in the streambed appears.		
<b>Tour:</b> (machine translated) At the big pool at the beginning the first one should be equipped with neo and build a rope ferry (see photo!)		
<b>Return:</b> (machine translated) After the last rapel through the slot in the rock face (at least that's how the observer below sees it) continue a bit in the streambed and then out to the left to the vehicle.
