Hydrology:

Access: (machine translated)
We must go to the parking lot of La Tejería
To do this on the N240 towards Lleida we will go to the Loporzano exit (A1227) and continue straight on towards Aguas. Shortly before arriving we will take the detour to the left to the Embalse de Guara. Before reaching the reservoir we will find a roundabout and a track on the left that leads to the parking of La Tejería.

Approach: (machine translated)
We will leave by the track taking the one that goes to the north and leaving aside the one that goes to San Cosme. This trail goes along "the ridge" to almost the base of the climbing wall of the Predicadera. Here we will have a path on the left that goes to the known as "Pito" which is nothing more than a large formation that will serve as a reference to pass by side in search of the upper part of the ravine. Once there we will go to the right in search of the ravine.

Tour: (machine translated)
A couple of abseilings and rappels to get to the circus with its magnificent R55.

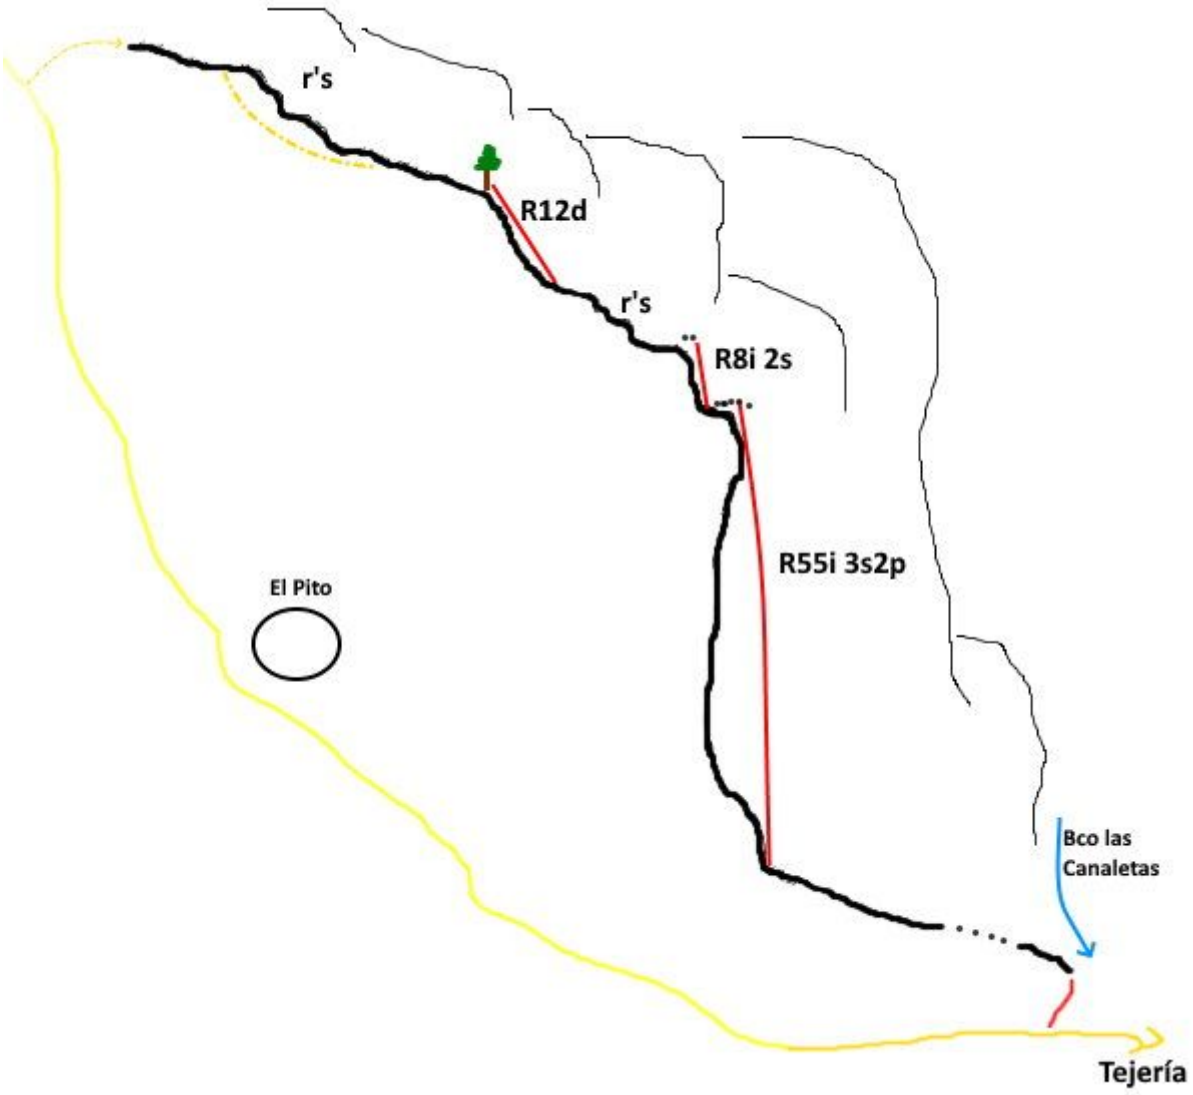

Return: (machine translated)
We will continue along the "riverbed" a few meters until we get out of the cirque. Once here we will go out to the right to take the access track.

Coordinates:
Canyon Start 42.2417 -0.2425
