Country: □□□□ / Nepal **Region:** □□□□□ □□□□□ / Gandaki **Subregion:** □□□□□ □□□□□ / Kaski **Town:** Karuwa		
Difficulty: a little difficult	**Grading:** v4 a4 V	**Total time:** 12h
Approachtime: 5h	**Tourtime:** 6h40	**Returntime:** 20min
Altitude entry: 2280m	**Altitude exit:** 1520m	**Delta Altitude:** 760m
Canyon length: 2500m	**Highest rapell:** 50m	**Amount rapells:** 30
Transport: on Foot	**Rock type:** gneiss	**Drainage area:** 20.00km²
Season: September - February	**Orientation:** Southeast	**Best Time:** 10-16 o'clock
Rating: ☆ 3.5 (1)	**Info:** ★ 2 (1)	**Belay:** ★ 2 (1)
Specialities:		
Gear: Ropes: 2x60m		
Summary: (machine translated) Gneiss canyon with lots of vegetation. Good warm-up tour for larger projects.		
Hydrology: (machine translated) Catchment area mainly forest. From October to February, mostly stable weather conditions with little precipitation.		
Access: (machine translated) Drive to Karuwa, you have to redeem the Annapurna Permit beforehand.		
Approach: (machine translated) Walk up to 2400m on the Mardi Himal East Trek. From there, follow a small hunter's trail through the forest to a tributary of Bhalaudi, where you rappel down to the main stream. Better ask for guides, Tanka and Chack should know the way down to the tributary.		
Tour: (machine translated) A few tight spots at the beginning, and cool rappels. Towards the exit a bit more blocks, but some jumps possible.		
Return: (machine translated) Look for tracks on the left, in the Seti valley a large hydro plant is being built, there are some forest roads that are not yet on the maps.		
Coordinates:		
Reports: 2025-01-16 | Bubtore | ☆ ☆ ☆ ½ | 🕮 ★ ★ | ⚓ ★ ★ | ≋ Normal | 👍 Completed Not too technical, but there are still a few waterfalls that have plenty of water pressure. (machine translated)
