Rating: ⭐ 3.5 (1)Info: ⚡ 2 (1)Belay: ★ 2 (1)

Specialities:

Gear:  
Ropes: 2x60m

Summary: (machine translated)  
Gneiss canyon with lots of vegetation. Good warm-up tour for larger projects.

Hydrology: (machine translated)  
Catchment area mainly forest. From October to February, mostly stable weather conditions with little precipitation.

Access: (machine translated)  
Drive to Karuwa, you have to redeem the Annapurna Permit beforehand.

Approach: (machine translated)  
Walk up to 2400m on the Mardi Himal East Trek. From there, follow a small hunter's trail through the forest to a tributary of Bhalaudi, where you rappel down to the main stream.  
  
Better ask for guides, Tanka and Chack should know the way down to the tributary.

Tour: (machine translated)  
A few tight spots at the beginning, and cool rappels. Towards the exit a bit more blocks, but some jumps possible.

Return: (machine translated)  
Look for tracks on the left, in the Seti valley a large hydro plant is being built, there are some forest roads that are not yet on the maps.

Reports:

2025-01-16 | Bubtore | ⭐⭐⭐👉 | 📖 ⭐⭐ | ⚓ ⭐⭐ | 🌊 Normal | 👍 Completed  
Not too technical, but there are still a few waterfalls that have plenty of water pressure. (machine translated)
