Ropes: 2x 60m

Summary: (machine translated)
For Ticino a cold rappel canyon, can be combined well in one day with Ambra Sup.

Hydrology: (machine translated)
North-facing, so the water is rather fresh.

Access: (machine translated)
Park at the parking lot not far from the Ambra reservoir.

Approach: (machine translated)
On the north side, take the path along Ambra, then cross the bridge and take the forest path up along Bri.

Tour: (machine translated)
Some nice rappels, also smaller jumps possible (or 3-5m slides at the exit of the rappel). The narrow part at the end is nice, although too short.

Return: (machine translated)
Exit again via the hiking trail at Cassinon 897, or continue with Ambra Sup. Between Cassinon and the confluence there are a few more slides and a nice 25m rappel.

Coordinates:
Canyon Start 46.3328 8.9038
Canyon End 46.3435 8.9062

Only went out late in the afternoon, nice canyon to have done once. It's usually not quite as dark as in the photos. Beware, stones can come loose in some rappels (if the rope moves sideways). (machine translated)
