Automatisch importiert von Schlucht.ch für Canyon Staubbach, Wasserstand: "Niedrig" Verankerungen: "gut" Die Seilstücke um die Bäume haben wir nicht ausgebessert. Die Bolts waren in Ordnung. Beim C175 am besten noch etwas Reserve haben beim Seil haben. Der nächste Stand ist orografisch links in einer kleinen Nische. All belay stations are in good condition. The sling on the tree leading to the “balcony” just before the exposed rappel section has been replaced. The C175m is actually closer to C180m. (We had 200m of ropes.) The belay station after C175 is 10m to the left as the crow flies! with Damian, Sami (machine translated)

All anchors in good condition. Some older rope around trees for the earlier abseils that could be changed but still ok condition. After the big abseil 175m the bolts can be found 10m approx to the left of the natural line of the rope in a little overhang.
