Country: España / Spain **Region:** Cataluña / Catalunya **Subregion:** provincia de Gerona / Provincia de Girona
Town:

Difficulty: easy	**Grading:** v2 a1 II	**Total time:**
Approachtime:	**Tourtime:** 2h	**Returntime:** 1h
Altitude entry: m	**Altitude exit:** m	**Delta Altitude:**
Canyon length: 450m	**Highest rapell:** 15m	**Amount rapells:** 8
Transport:	**Rock type:**	**Drainage area:** km²
Season: January - December	**Orientation:**	**Best Time:**
Rating: ☆ 0 ()	**Info:** ★ 0 ()	**Belay:** ★ 0 ()

Specialities:

Gear:

Summary: (machine translated)
Generally dry canyon except during the rainy season, with small rappels. Better with a combination of vehicles

Hydrology:

Access: (machine translated)
By the C16 through Berga to Guardiola de Berga or by the C17 to Ripoll and the N260 to Campevanol. In both options by the B402-Gi402 linking the towns of Campdevanol and Guardiola.
At 8kms from Campevanol we have Gombrèn and from here 2.6 kms to a left turn on a bridge where a road to Castellar de n'Hug and Montgrony comes out on the right. We go up this beautiful valley on the south side of Cadi until the detour (left Castellar and right Montgrony), we continue on the left right to the next sharp left curve, just where the high voltage line arrives, here we can leave the car back if we have it.
With the access car we will continue climbing until the road makes a sharp left turn on our torrent a few hundred meters from the monastery.

Approach: (machine translated)
Direct from the bridge

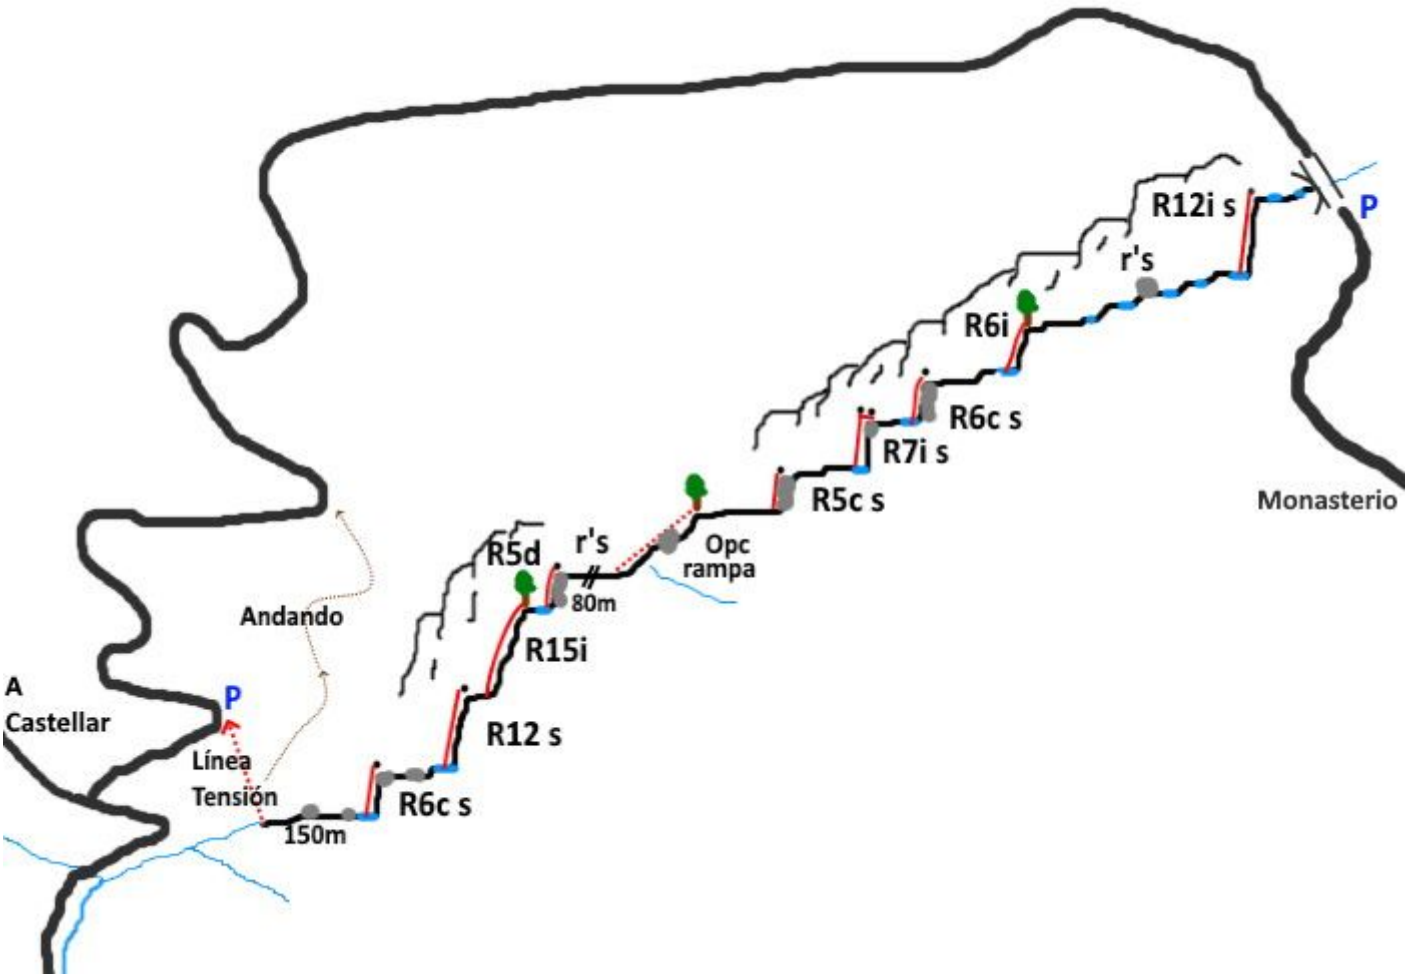

Tour: (machine translated)
Simple with installations to check

Return: (machine translated)
When we reach the high voltage line, we will exit to the right following it to the road.
In case of having only one car we can leave the high tension line halfway to go up the slope to the curve of the road. In both cases we should follow the road to the access car.
