<b>Specialities:</b>		
<b>Gear:</b>		
<b>Summary:</b> (machine translated) Largely open rappel canyon, somewhat remote.		
<b>Hydrology:</b>		
<b>Access:</b> (machine translated) From Tremosine up the Valle San Michele to the small reservoir at Eremo di San Michele (635m altitude). Continue uphill along the river - the car should have some ground clearance on this track - to Malga Prà delle Noci (685m altitude).		
<b>Approach:</b> (machine translated) From Malga Prà delle Noci (685m altitude) we follow the signposts to Malga Prà Pià (1350m altitude) - compass hiking trail 222. Before reaching Malga Prà Pià, we turn off the path to the left down to the stream. Here we walk downhill to an altitude of 1225m, where we join the trail.		
<b>Tour:</b> (machine translated) 20 Rappels. After about 2/3 of the descent, the stream from the Valle di Propriano comes from the left. We now continue in this stream. At the 65m rappel highlight (which can also be broken - about 45/20) there may be problems with the rope retrival. After the last (40m) rappel, the descent in the stream comes to an exit (925m altitude).		
<b>Return:</b> (machine translated) After the exit on the right bank of the stream downhill in the forest, partly on forest paths
