Summary: (machine translated)

Renovation needed, sparsely secured tour; well combinable with Canale della Trincea; beautiful view of Predil Lake; clean water; many places must be downclimbed.

Access: (machine translated)

From the Tarvisio Nord highway exit, head towards Passo del Predil. After the village of Cave del Predil Rabil, turn right towards Sella Nevea/Lago del Predil. From here, follow the road for approx. 3.2 km until you reach a large turn-off on the right with an old cannon and position. Park here directly in front of the position (exit).

Approach: (machine translated)

Shortly before the parking lot on the orographic left side of the stream, an inconspicuous path leads into the forest. Follow this steeply uphill to 1130m. Here you leave the main path on the left, walk up a little further and then look for a suitable descent to the stream at 1120m.

Tour: (machine translated)

At the beginning, large slabs of rock have to be descended/climbed down. When you reach the first step, you are left rappelling from a tree. After the steps, the canyon narrows briefly. Here you have to downclimb due to the lack of bolts. For another small 10m step, however, you will find an old single bolt on the left. Then it is downclimbed again. Shortly you will reach the highest abseil point of approx. 40m. The belay is on the right side and is very exposed. The best way to reach it is to set up a removable rope traverse. The rappel can be rappelled left in its entirety or you can rope to another chain anchor on the right and thus divide the rappel. Then follow the stream for approx. 200m to the parking lot (exit) at 980m.

Return: (machine translated)

You get out of the stream directly at the position (980m).
