Access: (machine translated) Coming from the south on the SS33, we pass Domodossola and take the exit to the north of this city. From here we head east and then on the bridge over the Isorno the orographic. left bank of the river. Here we go upstream until the end of the road (P2 - parking exit). The last 3.5 KM you drive on a bumpy sand road. With the second car back again, across the Isorno and then up to Altoggio. Here we park either in the large square at the entrance of the village or near the church. See approach and implementation sketch in photo gallery.		
Approach: (machine translated) In the village, walk in front of the church, before the short staircase turn right underneath a row of houses in the direction of the fields. Behind the house, briefly turn left and then soon right again across the meadow into the northeast corner of the cultivated fields. Here we find a wayside shrine and just behind it the beginning of a clear path. After passing the wayside shrine, we go downhill in switchbacks. We ignore the first path branching off in a serpentine, our path branches off to the left about 130m before reaching the bridge (stone man). Ascend about 10hm into a small saddle, then descend straight into the shallow valley on the other side. We soon reach a small house on the canyon rim. Here we now descend (yellow markers) to the bottom of the gorge - handrails are provided in sections. Man can also ascend from the lower parking lot to the entry. The path is registered in the OSM but should be difficult to find.		

Tour: (machine translated)

* Short downclimb\n * 18m rappel from chain right (can be jumped after 4m, narrow but deep pool)\n * 5min downclimb\n * 12m rappel or jump\n * 28m rappel from chain right. You can also rappel two meters before through a crevice into the dome behind the waterfall. If there is a lot of water it can be difficult to pass under the waterfall.\n * 50m swim in great ambiances\n * 15m rappel from chain right, can also be jumped\n * 18m rappel from chain left\n * 15m rappel from chain left above\n\nAnother longer swim follows through the last pool which is bordered by a dam. Climb up the left side of the dam over iron pins and then rappel 8m from two anchors on the right side.\n\n *\n

Return: (machine translated)

After the last rappel and the large pool, we climb down over the small weir and get out about 50m after that to the left over an overgrown forest road. In 2017 there were dozens of bee boxes in the area of the exit, be careful.

Automatisch importiert von Descente-Canyon.com für Canyon Isorno (final) Ambiance incroyable ! Aucun danger lié à l'eau. Beaucoup de relais sont pliés par la dernière crue. Le plus délicat a été d'accéder au canyon à partir du pont. (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/21414/observations.html>)

Everything tiptop! Meg beautiful tour. We drove up instead of walking due to repeated advice. Access was super easy to find thanks to the cairns. An absolute MUST in the region! Please call the power station beforehand. (machine translated)

Automatisch importiert von Descente-Canyon.com für Canyon Isorno (final) Si vous ne pouvez pas faire la navette, on vous déconseille la marche d'approche décrite dans DC : interminable (2h30 plutôt que 1h/1h30) et paumatoire dans des pentes super raides et à peine tracées (carto indispensable !). On est arrivé à l'entrée du canyon à 12h30 et ça tonnait déjà hélas ! On a donc prudemment renoncé pour se taper l'autre partie de la marche de retour par la route d'accès au village du départ ; heureusement on nous a pris en stop juste au démarrage de l'orage à 12h50 !!
