Summary: (machine translated)
Also known as Torrent de la Font dels Avets by its toponymy, it is a short, simple canyon, but with an environment worth visiting. Of course we will have to look for another descent in the area or activity to complete.
If we park in the village, please, let's change somewhere else.

Hydrology:

Access: (machine translated)
By the C16 from Berga to Puigcerda. We will pass Cercs and the reservoir, a couple of kilometers later we have the detour to the right to La Nou de Bergueda BV4022. Just when arriving at the village, at the church, we have a detour to the right to Cal Patzi, this is the way back.
We go around the church on the left, pass the tracks and we have the parking. In order not to disturb the neighbors when we change, we advise to follow the road for 100m, and after the curve to park.

Approach: (machine translated)
We will go up the road, right curve, left curve and a house, after which there is a path on the right that leads us down to the riverbed through a bridge.

Tour: (machine translated)
Simple, a couple of rappels and a few pitches. The longest rappel is a delight if it has the right flow.

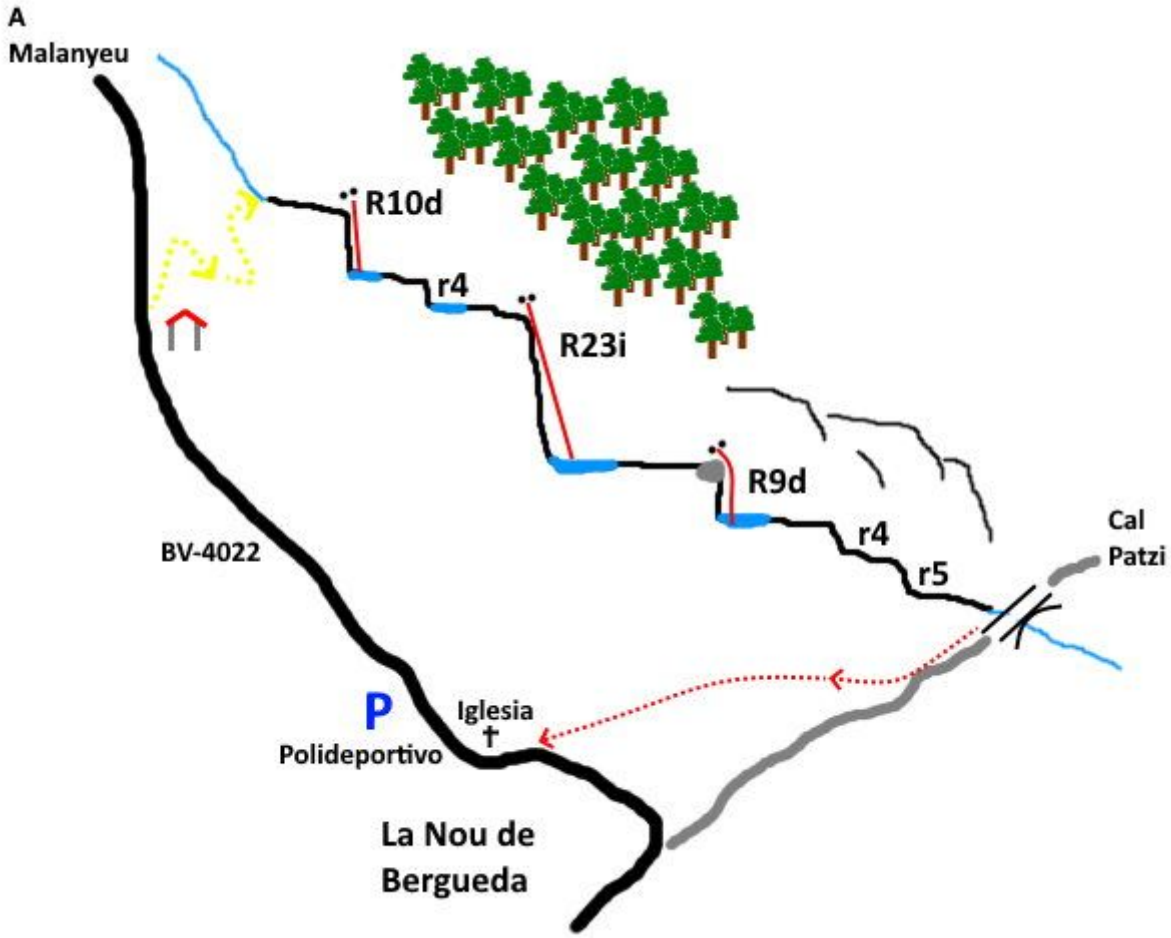

Return: (machine translated)
We follow the ravine to the track of Cal Patzi where we will go out to the right to look for the village. No need to follow the track, after a few meters we have a path on the right that takes us up to the top of the village.
