Transport:	**Rock type:**	**Drainage area:** km²
Season: January - December	**Orientation:**	**Best Time:**
Rating: ☆ 2.8 (2)	**Info:** ★ 0 ()	**Belay:** ★ 2 (1)

Specialities:

Gear:

Summary: (machine translated)
Barranco Mantuba or Lomo Morín, next to Barranco del Salto and Cuevas Negras, in the area of Silos. Possibility of access by Cuevas Negras with a single vehicle but the hike is long.
Vertical but accessible, when we can do it with water is a real delight, since they channeled the water from above it is difficult to find it with a thread but after heavy rains we can have the opportunity.
Within the Plan Rector de Uso y Gestión del Parque Rural de Teno (PRUG). Permission must be requested at the cabildo

Hydrology:

Access: (machine translated)
We are located next to Buenavista del Norte, in the village of Los Silos on the TF42.
Just in the village, p.k. 11.5 Susana street comes out and there are the signs to Cuevas Negras, here there is a place to leave the car for the return.
Access to Salto, Mantuba, Cueva Negra and Cochinos banks.
We continue up to the traffic circle at p.k. 11 and take it up to Tierra del Trigo, once there we go up to the hermitage of Nuestra Sra de Lourdes, right next to it we park.

Approach: (machine translated)
Approaches to Salto, Mantuba, Cueva Negra and Cochinos bcos.
We follow Los Rijos until we reach a path on our right that passes the Juan Alonso bank until we reach a track. We continue and find the water channel just at a bend in the trail on the left. We will go along the canal for about 600m to the head of the trail.

Tour: (machine translated)
See mole

Return: (machine translated)
We will descend until we find some pipes that we will take to the left to the track that takes us to the PR of Silos, we will go down until we reach the vehicle.

Coordinates:
Canyon Start 28.3544 -16.8085
Canyon End 28.3572 -16.8123
Parking at Entry 28.3526 -16.8032
Parking at Exit 28.3648 -16.8174

Once upon a time... the only canyon on the island with water all year round. The water supply has been interrupted for a year now and since then this canyon is probably also very often dry (machine translated)
