Summary: (machine translated)
river walk

Hydrology:

Access: (machine translated)
On the A-138 (Bielsa - Barbastro) either from Ainsa 18.4 km southward or from Barbastro 35.7 km northward to Mesón de Ligüerre with the campsite of the same name. At the traffic circle turn west, after 2.7 km cross the Rio Cinca, now uphill and later on the right passing the village of Palo (8.7 km from Mesón de Ligüerre). 11.4 km after the fork, we cross the Rio Usia and turn left just after the bridge. Going downstream in a westerly direction, after a good 2 km (from the bridge) we come to Humo de Tierrantona (= El Humo de Muro). Here the way to the village parking lot is signposted.

Approach: (machine translated)
From the parking lot at Humo de Tierrantona (= El Humo de Muro), take the dirt road west down to the river.

Tour: (machine translated)
You then walk in the open riverbed for about half an hour until you reach the first narrowing and thus the attractive part of the canyon.
From here it is attractive and ideal for a walk with children.

Return: (machine translated)
You can either go back in the riverbed or bypass the narrow part on the orographic right side via a path. This way you get back to the parking lot.

Coordinates:
Canyon Start 42.3341 0.2337
Canyon End 42.3307 0.2169

Automatisch importiert von Descente-Canyon.com für Canyon Usia Très sympa, le niveau du lac étant haut je n'ai pas eu à marcher dans la boue.Suis remonté par le canyon, seul une marmite nécessite de faire un peu l'otarie pour remonter, le reste se remonte sans problème. (Quelle: https://www.descente-canyon.com/canyoning/canyon-debit/22946/observations.html)
