Country: España / Spain **Region:** Aragón **Subregion:** Huesca **Town:** Colungo		
Difficulty: not as difficult	**Grading:** v3 a1 III	**Total time:** 2h35
Approachtime: 35min	**Tourtime:** 1h45	**Returntime:** 15min
Altitude entry: 710m	**Altitude exit:** 580m	**Delta Altitude:** 130m
Canyon length: 800m	**Highest rapell:** 15m	**Amount rapells:** 5
Transport: on Foot	**Rock type:** conglomerate	**Drainage area:** km²
Season:	**Orientation:** West	**Best Time:**
Rating: ☆ 2.5 (2)	**Info:** ★ 0 ()	**Belay:** ★ 0 ()

Specialities:

Gear:
Ropes: 1x30m

Summary: (machine translated)
Varied conglomerate rappel canyon

Hydrology:

Access: (machine translated)
From Barbastro in the direction of Alquézar. After about 20 km on the newly extended A 1232, turn right at the junction at the Rio Vero bridge (beyond the Camping Rio Vero bridge) and continue on the A 2205 via Colungo in the direction of Arcusa, Ainsa. The road now winds its way northwards. Cross the Bco Palomeras Fornocal and a few hundred meters further on you will reach the Puente de las Gargantas over the Rio Fornocal. Park your car here.

Approach: (machine translated)
On the east side of the bridge, a trail first heads north towards the edge of the Sarratana. It soon turns to the east and leads along the edge of the conglomerate canyon, rising only imperceptibly almost to the end of the valley. After crossing a small stream channel, it then descends to the entry point.

Tour: (machine translated)
First "Gumpenhüpfen", then rappel, partly in the "Souterrain".

Return: (machine translated)
After emerging from the last part, which is almost underground, you reach the Rio Fornocal after a few meters and follow it downhill under the road bridge high above. About 70m after the bridge, a track on the right, initially crossing an old concrete water pipe, climbs steeply up to the bridge (if in doubt, keep to the right). Take the same ascent after the Fornocal and the Palomeras Fornocal.

Coordinates:
Canyon Start 42.1937 0.0696
Canyon End 42.1908 0.0601

Automatisch importiert von Descente-Canyon.com für Canyon Sarratanas Encore de l'eau dans les vasques (pas encore croupies) mais ne coule plus. Le combi se supporte pour sauter dans les vasques (mais certains on fait sans aujourd'hui ;-)). A combiner avec palomeras fornocal en cas de mauvaise météo, combo sympa. Joli marche et canyon.
