Altitude entry: 930m	**Altitude exit:** 600m	**Delta Altitude:** 330m
Canyon length: 500m	**Highest rapell:** 30m	**Amount rapells:** 9
Transport: on Foot	**Rock type:**	**Drainage area:** km²
Season: June - October	**Orientation:**	**Best Time:**
Rating: ☆ 0 ()	**Info:** ★ 0 ()	**Belay:** ★ 0 ()

Specialities:

Gear:
Ropes: 2x 40m

Summary:
Short but nice and narrow stream.

Hydrology:
Almost non-existent flow rate due to a water intake at the start. To be done as a fallback option when other streams are impassable.

Access:
From the A26 highway, take the exit for Villadossola and follow signs for Valle Antrona. Drive up the valley past the hamlet of Rivera. Cross a bridge over the Ovesca stream and, after about 500 m, park on the left near a festival/recreational area.

Approach:
Behind the chapel in the festival area, hike up through the woods following a trail (which becomes clearer further up) until reaching the intake tunnel and the streambed.

Tour:
No particular difficulty. Some unequipped rappels (abseils) to be downclimbed or descended using natural anchors.

Return:
Exit directly at the car.
