Hydrology:

Access: (machine translated)
Location of Bujamé and Molina bcos.
On the road to Buenavista del Norte, with the return car we will continue towards the lighthouse / Punta de Teno on the TF445. At the p.k. 2 we will find on the left the Casa Blanca. Here we will leave the return vehicle.
With the access vehicle we return to Buenavista, we leave by the road to El Palmar TF436, just past El Palmar we take the detour to the right to Teno Alto. We will go up almost to Teno, it is about 3kms of road until a left curve with Morro Cueva on the right, we can park here or 100m later in another left curve with a fence on the right and the beginning of the PR.

Approach: (machine translated)
Access to Bujamé and Molina bcos.
By the PR, we leave by that track, that in many zones is eaten by the undergrowth, until 1km where there is a fork. This fork to the left following the descending path. About 150m later we find another fork where we will go to the right. Here we will go about 700m leaving the ridge to the right and taking the next fork to the right. From here we can already intuit the small watercourse that meters further becomes vertical. We will follow the zigzagging track for about 600m to leave it to go to the right to the cut.

Tour:
Ver topo

Return: (machine translated)
After the last vertical we follow the riverbed for destrepes between too much vegetation to a few meters later reach a pipe and a channel where we left to take a path that will take us to a water tank, after him the private road to the left leads us to our road. We take it to the left and soon the car.

Coordinates:
Canyon Start 28.3419 -16.8616
