Country: France **Region:** Provence-Alpes-Côte-d'Azur / Provence-Alpes-Cote d'Azur **Subregion:** Alpes-Maritimes **Town:** Pont-du-Loup		
Difficulty: not as difficult	**Grading:** v1 a3 I	**Total time:** 3h5
Approachtime: 20min	**Tourtime:** 2h30	**Returntime:** 15min
Altitude entry: 340m	**Altitude exit:** 250m	**Delta Altitude:** 90m
Canyon length: 1200m	**Highest rapell:** 10m	**Amount rapells:** 2
Transport: Car optional	**Rock type:** limestone	**Drainage area:** km²
Season:	**Orientation:** South	**Best Time:** 10-15 o'clock
Rating: ☆ 2.1 (1)	**Info:** ★ 0 ()	**Belay:** ★ 0 ()

Specialities:

Gear:
Ropes: 1x20m

Summary: (machine translated)
Aquatic river walk through the lower parts of the Loup

Hydrology:

Access: (machine translated)
From Grasse (on the N 85) head north-east (Chateauneuf-Grasse) on the D 2085 and after 6 km turn left onto the D 2210. You will reach Pont du Loup after 6.5 km. Park one vehicle in the parking lot on the left before the bridge. Take the other vehicle over the bridge and then turn left onto the D 6 towards Greolières. After 3 km, drive through a tunnel; immediately afterwards, park the other vehicle on the left.

Approach: (machine translated)
About 250 m further up the road we come to the cascade of Bes-Courmes. From the road here turn right into the water and then left with two rappel (10 and 4 m) under the bridge down to the Loup.

Tour: (machine translated)
After the second 4 m slide, the water plunges down a rapid into a narrowing (key section). There is danger here even with normal water flow, so you should bypass it on the left (then right over the bridge and left - if necessary with a jump - to get back in).

Return: (machine translated)
Either at the first iron bridge or getting off at the level of the second iron bridge, you will reach the parking lot at Pont du Loup after about 600 m or 500 m respectively.

Coordinates:
Canyon Start 43.7419 7.0005
Canyon End 43.7419 6.9964

Automatisch importiert von Descente-Canyon.com für Canyon Loup Attention, un guide nous à dit qu'au niveau de la retenue d'eau de Bramafan ils avaient un peu lâché les vannes... gros débit, dangeureux dans les toboggans. Faites attention. (Quelle: https://www.descente-canyon.com/canyoning/canyon-debit/2932/observations.html)

Automatisch importiert von Descente-Canyon.com für Canyon Loup Avec les 2 rappels de départ et jusqu'à l'encaissement final (les groupes sortent souvent après le tob éjectable).Beaucoup beaucoup de groupes, même un jour de semaine.Bon débit, quelques mouvements d'eau à éviter pour les très jeunes poids plumes.Pour la sortie, on a continué après l'encaissement final, puis on a suivi le sentier rive droite jusqu'à repasser rive gauche par une passerelle (pas la même que celle de l'encaissement final).Juste à la sortie de la passerelle, on a pris les mains courantes qui montent dans la forêt (bien raide) jusqu'à la route.
