Summary: (machine translated)

Aquatic river walk

Hydrology:

Access: (machine translated)

From Grasse (on the N 85) in a northeasterly direction (Chateauneuf-Grasse)out on the D 2085 and after 6 km turn left on the D 2210. You reach after 6.5 km Pont du Loup. Park a car in the parking lot on the left before the bridge. Cross the bridge with the other car and turn left onto the D 6 in the direction of Greolières. After 3 km you pass through a tunnel; immediately after, park the other vehicle on the left.

Approach: (machine translated)

About 250 m further up the road we come to the cascade of Bes-Courmes. From the road here turn right into the water and then left with two rapell (10 and 4 m) under the bridge down to the Loup.

Tour: (machine translated)

After the second 4-m slide, the water falls in a rapid down into a narrowing (key section). There is danger here even with normal water flow, so that it should be avoided on the left (then on the right over the stoop and on the left - if necessary with a jump - re-enter).

Return: (machine translated)

Either at the first iron bridge or getting off at the level of the second iron bridge, you will reach the parking lot at Pont du Loup after about 600 m or 500 m respectively.

Automatisch importiert von Descente-Canyon.com für Canyon Loup Parcouru a 19h a deux, a part quelques baigneurs nous étions seuls. Première fois dans ce canyon, je ne m'attendais pas a un tel debit a cette période de l'année. (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/2932/observations.html>)

Automatisch importiert von Descente-Canyon.com für Canyon Loup Enchaîné bes courmes et le loup. Le Parking situé au pied de la cascade est fermé. On s'est garé a "pont du loup" sur le parking situé vers la confiserie, 25 mn de marche après la sortie du loup sur un chemin situé en rive droite. Ca permet de continuer les gorges plus bas c'est sympa. Débit correct pour le loup, tout passe (sauts et toboggs).
