**Summary:** (machine translated)

Aquatic river walk through the lower parts of the Loup

**Hydrology:**

**Access:** (machine translated)

From Grasse (on the N 85) head north-east (Chateauneuf-Grasse) on the D 2085 and after 6 km turn left onto the D 2210. You will reach Pont du Loup after 6.5 km. Park one vehicle in the parking lot on the left before the bridge. Take the other vehicle over the bridge and then turn left onto the D 6 towards Greolières. After 3 km, drive through a tunnel; immediately afterwards, park the other vehicle on the left.

**Approach:** (machine translated)

About 250 m further up the road we come to the cascade of Bes-Courmes. From the road here turn right into the water and then left with two rapell (10 and 4 m) under the bridge down to the Loup.

**Tour:** (machine translated)

After the second 4 m slide, the water plunges down a rapid into a narrowing (key section). There is danger here even with normal water flow, so you should bypass it on the left (then right over the bridge and left - if necessary with a jump - to get back in).

**Return:** (machine translated)

Either at the first iron bridge or getting off at the level of the second iron bridge, you will reach the parking lot at Pont du Loup after about 600 m or 500 m respectively.

Automatisch importiert von Descente-Canyon.com für Canyon Loup Je ne sais pas si c'est récent ou pas, car je n'étais pas venu dans le Loup depuis un moment, mais l'avant dernière vasque juste après le bief de l'encaissement sous la passerelle, ne se saute plus. De gros blocs sont au fond suite à l'effondrement de son bord RD (effondrement bien visible). C'est assez piégeux car la vasque, elle, n'a pas bougé !! Automatisch importiert von Descente-Canyon.com für Canyon Loup DC+, ça pousse bien par endroit. Quelques mouvements d'eau peuvent piégeux avec un débit important. Quelques groupes avec des guides locaux. Le canyon est glissant sur quelques parties. Nous avons enchaîné Courmes et le loup pour faire une descente complète et ludique. 04h00 en tout voiture-> voiture sans se presser. Automatisch importiert von Descente-Canyon.com für Canyon Loup Le débit m'a paru conséquent pour descendre avec les enfants, on a préféré contourner la majorité des obstacles car ça poussé trop. En tant qu'adulte ça passe
