Description copied from descente

Hydrology:

Access: (machine translated)
Approach Aval: From Rome take the A1 in the direction of Naples. Exit at Ceprano. Follow the signs for Arce, Isola de Liri, Sora and continue towards Avezzano. Do not miss the direction of Pescosolido and then go to Campoli Appenino. Park in front of the village under the bridge over the Lacerno, which is dried up at this point.

Access from above: From Campoli Appennino, go to Pescosolido. 700 meters after the crossroads you will be in the center of the village. Turn right to pass the old church (Largo Vescavo Ruggieri). Follow Via Piacenza and then Via Colle. Do not follow this road to the exit, but take the first road on the right that goes uphill. You will leave the village. 700 meters further on the road becomes a dirt road. Pass the first barrier and go straight on at the fork. You will walk along fields (picnic area) and pass a second barrier. The parking lot is at the end point, by the watering holes.

Copied from Descente

Approach: (machine translated)
Multiple accesses with or without shuttle.

Upstream approach : From the watering holes, take the wrong path to the left. You will again encounter watering holes and continue straight following the markings of the AIC (white square, blue dot). You will quickly come across GR Q8. Go right and follow it for 1 hour and 15 minutes, passing a virgin in a tree stump. The GR finally reaches the watercourse again.

Middle and lower access: take the trail below the watering holes. It meets a path that you follow. At its exit, continue straight (the left branch meets the GR Q8). For 45min follow the mountain side until you meet the footbridge of the lower part. Go up the RD path until you reach the footbridge of the middle part

Tour: (machine translated)
Upper part: Apart from the 20m waterfall, the inlets lack character and the obstacles amidst tree trunks are uninteresting and poorly equipped.

Middle part: from the footbridge, it goes through the graveyard of rotten wood to the first gulch, which does not present any difficulties. After another area of intertwined logs, cross the second gulch.

Lower part: at the second jetty, the lower part begins with a nice 22 m rappel (MC+2 pts RG). After the second indentation, the interesting parts end.
Paths follow the watercourse until its exit.

Return: (machine translated)
Exit onto a left bank trail.

From the upstream part you can get off at the footbridge. Otherwise, after the last indentation of the lower part, follow the trails passing RD and RG. The path climbs RG. At the beginning of the boulder field, keep right. It finally reaches the bridge.

Coordinates:
Alternative Canyon Start 41.7746 13.6992
Canyon End 41.7569 13.6971
Canyon Start 41.7863 13.6813
Parking at Entry 41.7532 13.6777
Parking at Exit 41.7449 13.6815
