Specialities:

Gear:

Summary: (machine translated)
Simple initiation canyon that will take water out of the summer. Caution with storms that can load fast.
Check regulations:
https://barrancossierradeseguraalbacete.blogspot.com/?m=0

Hydrology:

Access: (machine translated)
We must get to Yeste for it by the A30 take exit 56 to the CM412. We will continue until after Elche de la Sierra that we will take a detour to the left to the CM3206 to Yeste.
At the exit of Yeste we take the detour to the left to the A63 to La Graya. We will pass the Alcantarilla turnoff leaving it on the right and shortly after a bridge over the Segura and a road that goes up to the village of Chorreones. We can park here, if we want to combine with Chorreones or go up the road to Chorreones about 1km to a track that goes to the right and park up here.

Approach: (machine translated)
Access to the Chorreones and Inf banks
We will take the track that comes out to the right to go down to the bed of the stream, the track goes a few meters parallel and when it tends to separate from the bed we get into

Tour: (machine translated)
We will walk for 150m, here we find the first rappel, two parabolts on the left. We follow the riverbed for 100m and find the second ledge, 5m, also on the left with two parabolts. About 40-50m later we go out on the right, to continue along the riverbed so dressed is unfeasible and we go up the embankment to the road. Great caution

Return: (machine translated)
Along the embankment to the road
