According to the fishing regulations of the Canton of Bern, this section of water may only be used from 16.04.-30.09.

Specialities:

Gear:

Summary: (machine translated)
Top of 3 canyoning accessible and spatially separated parts. Short, but fierce in terms of water flow in the narrow canyon.

Hydrology:

Access: (machine translated)
We leave the A8 coming from Bern at Interlaken via exit 25 - Wilderswil. We drive south, through Wilderswil and up to Saxeten. We drive through the village up the valley, pass a hamlet with a bus stop and park our car 750m further on, after the bridge over the stream from the Renggraben, in the parking area on the right. From here on, further travel by motor vehicle is no longer permitted.

Approach: (machine translated)
We continue along the road and after 350m we come to a place where a road branches off to the right. We follow it, after the long right turn we take the hiking trail up to the left and at the top we meet the road again. It brings us immediately to a farm. Here we now walk about 100m along the path to the east, directly towards the streambed. Shortly before reaching the streambed, take the grassed dirt road to the left and follow it for about 150m until you reach the bank of the Saxetbach (entry).

Tour: (machine translated)
After a few meters in the open streambed, the canyon begins. Already the second waterfall (C20) can be unpleasant even with average water flow in midsummer, because rappel in the stream can not be avoided. A C15, a C30 and finally a C18 follow. Then the descent is already over and we leave the streambed to the left onto the road.

Return: (machine translated)
The approach back to the car.

A fun day trip to round out a day when you already have other plans. Paragliding, canyoning, and then a jet boat ride—pretty cool, actually. (machine translated)

Automatisch importiert von Descente-Canyon.com für Canyon Saxetbach (amont) Coup de cœur pour ce court mais très beau canyon. À faire l’après midi pour être au soleil c’est encore mieux.Approche et retour comme dans la fiche, RAS.On a doublé les 2 relais monopoints en petits goujons inox.On recommande ! Automatisch importiert von Descente-Canyon.com für Canyon Saxetbach amont Joli canyon.C30: deux relais dont le premier, visible du haut, est mono point car il manque actuellement une plaquette (à remettre). Le deuxième est doublé mais un peu plus difficile à atteindre (1.5m plus haut et plus en RD).C18 : mono point presque caché sous la mousse. Il s'agit bien du filet d'eau de gauche mais les points C8 et C18 sont sur la droite.Globalement, les D8 semblent plus longs. Surtout au niveau de la C15. Ma corde de 25m était limite. All hooks ok. C20 and C30 are now double drilled. The water pressure at the C20 was already quite strong. All other rappels were no problem at this water level. Water level, see pictures. (machine translated)
