Automatisch importiert von Schlucht.ch für Canyon Ria de Carnac, Wasserstand: "Mittel" Verankerungen: "Ok" Rutschig. Empfehlung: Oberen Teil auslassen und beim ersten Haus auf dem Hinweg den Wegspuren zum Bach folgen. So verpasst man 2 Abseiler und viel Bachwandern. Surprisingly much water, although the other streams have little water. Got in at the confluence of the two streams. However, the canyon is only worthwhile from Mondan onwards. Set a total of 3 anchors. (machine translated)

All anchors available. Although other streams in the area have little water, the canyon has a sporty water level. The water is also pooled at some rappels and therefore has a lot of pressure. Good abseiling technique required. Very slippery. (machine translated)
