Country: España / Spain **Region:** Cataluña / Catalunya **Subregion:** provincia de Gerona / Provincia de Girona
Town:

Difficulty: not as difficult	**Grading:** v3 a3 II	**Total time:** 1h45
Approachtime: 5min	**Tourtime:** 1h	**Returntime:** 40min
Altitude entry: m	**Altitude exit:** m	**Delta Altitude:**
Canyon length: 1000m	**Highest rapell:** 16m	**Amount rapells:** 5
Transport:	**Rock type:**	**Drainage area:** km²
Season: September - May	**Orientation:**	**Best Time:**
Rating: ☆ 0 ()	**Info:** ★ 0 ()	**Belay:** ★ 0 ()

Specialities:

Gear:

Summary: (machine translated)
Short, simple and when it carries water, interesting descent. In some guides they speak of the complete descent to the road bridge but we consider that it is more interesting to make only this part, in which it is not necessary to combine cars and thus to be able to combine with some other in the area.
If we want to do it with good flow it is better to avoid the summer.

Hydrology:

Access: (machine translated)
Take the C16 through Berga to Guardiola de Berga, or the C17 to Ripoll and then the N260 to Campevanol. For both options, take the B402-Gi402, which connects the towns of Campevanol and Guardiola.
Gombrèn is 8 km from Campevanol, and from there it’s 2.6 km to a left-hand curve on a bridge, where a road branches off to the right toward Castellar de n’Hug and Montgrony. We’ll drive up this beautiful valley on the southern slope of the Cadí until we reach the fork (left to Castellar, right to Montgrony), then continue left toward Castellar.
We’ll pass by the Castell de Mataplana on our way to the Espluga mountain hut and pass. Right at the pass, there’s a 90° right-hand curve; here, we have three options.
1. Take the trail straight ahead and park there.
2. Continue along the trail straight ahead for 1 km until you reach a clearing where you can park (the exit from the ravine is down there).
3. Continue toward the headwaters.
If we’re continuing on the road or have two cars, we’ll head toward Castellar for 2 km until we reach a right-hand curve of nearly 90 degrees with a pull-off on the left; from there, we’ll see trail markers leading down to the river.

Approach: (machine translated)
From the upper parking lot it is direct by the marks towards the river.
From the lower parking lots we have to go up to the road and follow it until the curve indicated.

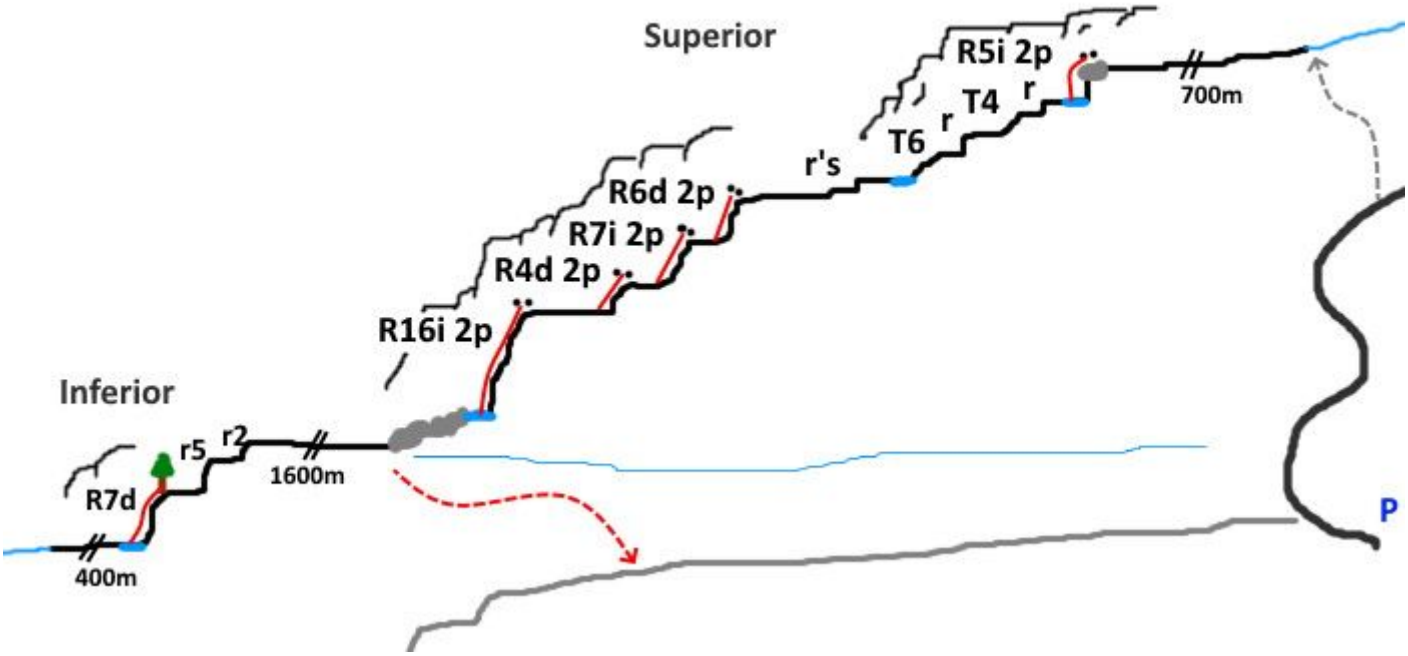

Tour: (machine translated)
Entertaining descent although without much entity, a first rappel without much to enter a walking area. Then, we have a succession of slides and chutes to reach the
to reach the final part where we have the R3 and R4 that can be chained and the R5 of 16m which is the longest.

Return: (machine translated)
After this rappel we will leave to the left by the Empriuet stream, we go up it a few meters and on its orographic right there is an old track that would take us up to the curve of the road. If we have the car on the track we will have to cross the stream and look for a place to go up the forest to the track.
If we have the car up we will be able to look for, by the orographic right of the creek, the best way to go up to the meadows bordering the road and from there to follow it up to the car.

Coordinates:
Canyon Start 42.2618 2.0712
Canyon End 42.2589 2.0421
