There was a little bit of water at the top, which disappeared before the bridge. The first section of the top part is not very interesting, but just before the bridge it's nice. Below the bridge there is lots of trash, but all of a sudden water appears from a little hole in the wall and you rappel into a short but beautiful section which makes it all worth it. Definitely needs some new anchors though.

Nice tour. Everything ok. Only walked up to the bridge (slope/intermediate exit). (machine translated)

The end in the grotto is particularly beautiful. (machine translated)
