**Specialities:**

**Gear:**

**Summary:** (machine translated)
A descent not very frequented, it is neither the most aesthetic, nor the longest... perfect to combine with the nearby Ferrata de Racons and descent of the Torrent del Grau.

**Hydrology:**

**Access:** (machine translated)
In Andorra La Vella we will take the CG2 towards Envalira.
Just before reaching Canillo we will see a gas station on the right and a detour to the left along the Cami del Riu d'Urina. We will go to the end where there is a curve and we will be able to park.
Update October 2024: In the curve have been arranged stones and branches to not park and bother, there is plenty of room to park on the street that goes up side and side.

**Approach:** (machine translated)
We will leave by the path to the viewpoint of Quer that quickly goes up with the waterfall in the background, the second sharp turn to the right there is a path in front of the stream we take it and we will enter there.
Another option is by the path that goes to the climbing routes, when we reach the waterfall wall we take a path on a steep slope to the left (orographic right of the ravine), it crosses the ravine above the waterfalls and goes to the same path above.

**Tour:** (machine translated)
If we catch it with water it is a descent with a quite interesting waterfall although not very spectacular or high. The ideal is to complement the day doing other activities in the area.

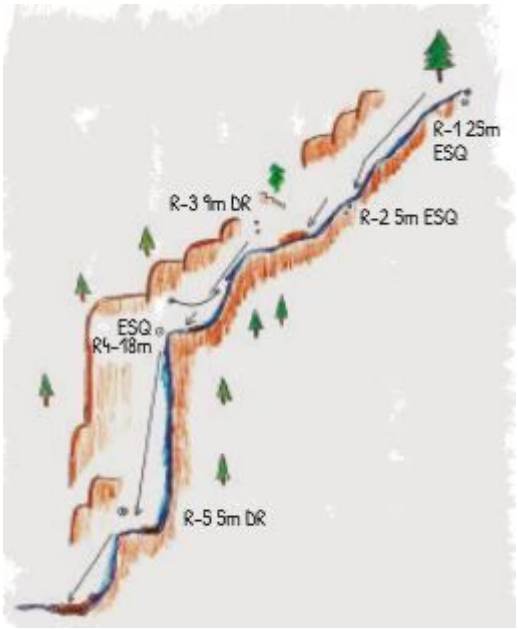

**Return:** (machine translated)
After the waterfall we followed the trail back to the car.

**Coordinates:**
