Automatisch importiert von Descente-Canyon.com für Canyon Maillet Ne pas se fier au débit du bas du canyon, il y a un captage sur la fin. On a évité quelques passages dans le bouillon sur l'amont du canyon. Le grand rappel passait bien malgré le gros débit. Une tyrolienne était installée sur la fin (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/21192/observations.html>)

2024-07-19 | Euphoria |⭐⭐⭐|📖⭐|📍⭐⭐|🌊 Normal |👍 Completed

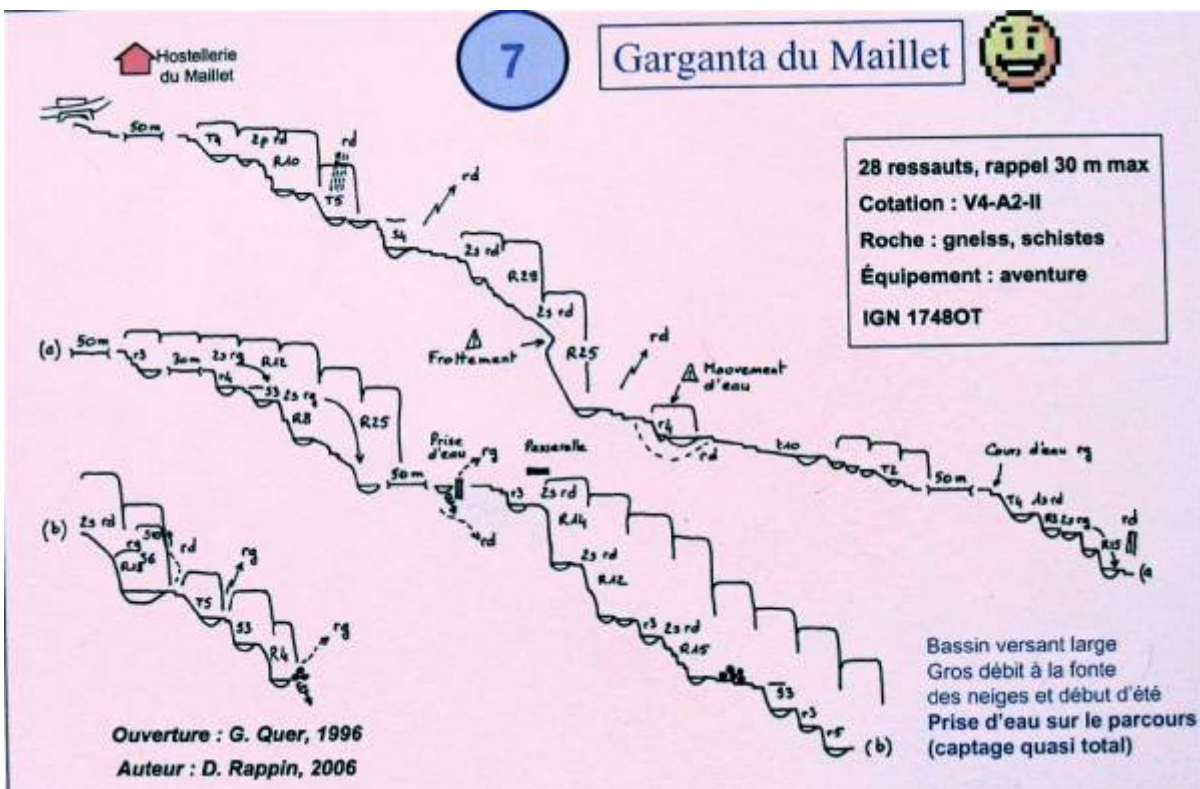

Flow increased at noon due to the thaw and the contributions of its tributaries. Attached photos. Pools with some movement, but visible and avoidable, without problems. The information in the description does not coincide with the verticals. Beware of jumps and slides, receptions with stones and mostly uncovered. Incredible scenery and atmosphere.
