<b>Summary:</b> (machine translated) rappel canyon		
<b>Hydrology:</b>		
<b>Access:</b> (machine translated) From Geneva on the A 40, then the N 205 to Chamonix (from the border 86 km).\nFrom there continue on the N 506 via Argentiere and Vallorcine in the direction of Martigny (Switzerland). 1,5 km after Vallorcine we turn left to the hamlet of Barberine. Before the bridge over the L'Eau Noire on the right 50m downhill large parking lot. Park your vehicle here.\nAlternatively, the approach from Switzerland: from Martigny in the Rhone Valley on the Route de la Forclaz (which begins at the southwest end of the city) towards Chamonix (France). After 21,5 km we pass the border to France. 400 m further on we turn right to the hamlet of Barberine. Before the bridge over the L'Eau Noire on the right 50m downhill large parking lot. Park your vehicle here.		
<b>Approach:</b> (machine translated) Cross the bridge and continue to the hamlet of Barberine (about 1155 m a.s.l.) and a little later on a footpath towards "Barrage d'Emosson, 1931 m". At 1595 m a.s.l. a path branches off to the right (to the east) in a left bend in the direction of Le Chatelard, Firnhaut. It leads down to the stream.		
<b>Tour:</b> (machine translated) The canyon on the national border is oriented southeast and has two parts separated from each other. After the narrow section, you exit to the right onto the ascent path and then reenter further down before the 40 m rappel. The canyon is often commercially climbed.\nIt is attractive because of its possible jumps in the first part, but above all because of the scenic ambience with the fantastic view of the four-thousand-meter peaks around Argentiere and Chamonix.\nBecause the canyon lies below the Emosson reservoir, it is advisable to call the Centrale de Vallorcine before the climb (tel. 0450546064) - see also: <a href="http://www.emosson.ch/PublicDE/Securite.htm">http://www.emosson.ch/PublicDE/Securite.htm</a>		
<b>Return:</b> (machine translated) Turn right at the bridge and follow the trail up to Barberine and back to the car.

Automatisch importiert von Descente-Canyon.com für Canyon Barberine Partie basse, peu de glace, pas de neige, terminé pour les conditions hivernales (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/2423/observations.html>)

Automatisch importiert von Descente-Canyon.com für Canyon Barberine Partie haute: on a changé des cordes d'amarrage, mais il en reste encore quelques unes pas top. Surtout il y a des mousquetons bien morts dont le doigt a été scellé qu'il faudrait virer. Il serait utile d'y retourner avec une scie à métaux. Partie basse: suréquipé, c'est disneyland, sauf que ce n'est pas ludique et ça dure 10 minutes. Un peu du foutage de gueule (et je suis modérée) (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/2423/observations.html>)
