Summary: (machine translated) forest canyon		
Hydrology:		
Access: (machine translated) From Geneva on the highway A 40 about 65 km in the direction of Lyon. After 3 shorter tunnels, you pass the small town of Nantua (on the right below a high viaduct) and then go through a tunnel about 3 km long. The highway branches and we take the A404 heading north (towards Oyonnax) into the French Jura. 5 km after the interchange we also leave the A404 and change to the D979 leading westwards in the direction of Bourg-en-Bresse. From here we drive about 14 km to the village of Derrières-sur-Ain, situated on the river Ain. We turn right from the D979, pass through the mentioned village, meet the D91, which follows the river Ain. On the left we go under the high road bridge, then we have reached the place where we park the lower car. With the second car we go downstream on the D91 (direction Poncin) for a good 1 km, to turn left uphill in the direction of Chales-la-Montagne just before reaching the hamlet of Merpuis. It goes uphill in bends for about 2.4 km, then we reach a clearing just before the road leaves the forest. Park the upper car here.		
Approach: (machine translated) We take the forest road that runs north along the edge of the forest (but within it). After about 500m you reach the stream.		
Tour: (machine translated) Rappel canyon, in the absence of water flow only for collectors. At the exit of the tour swimming possibility in the Ain.		
Return: (machine translated) After the last rappel, follow the path that runs downstream and sometimes indistinct, you can refresh yourself at a cold karst spring, if necessary, and come directly to the car on the D 91. Here you can cleanly bathe your neo in the river Ain.

Automatisch importiert von Descente-Canyon.com für Canyon Noire Fontaine Parcouru sans navette, le chemin qui longe le canyon permet d'aller à l'amont. Raide mais sans difficulté. Jolo débit aujourd'hui, qui permet, pour une fois de jouer dans les cascades. (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/2178/observations.html>)

Automatisch importiert von Descente-Canyon.com für Canyon Noire Fontaine Pour une fois qu'il y a de l'eau dans ce canyon, je conseille à tout le monde d'y aller ces prochains jours. La décrue peut être rapide et ça reste une descente qui vaut le coup. Je mets une photo de la dernière cascade. Toute les autres cascades du secteur où il n'y a pas trop d'eau d'habitude sont bien en eau aujourd'hui (monts d'eau, grand pichet...) 2023-10-22 | System User | |📖|📌|🌊 Dry |🟢 Completed

Automatisch importiert von Descente-Canyon.com für Canyon Noire Fontaine Malgré les pluies importantes de la semaine, rien ne coule mais les vasques ont été lavées On a rencontré l'inventeur du canyon sur le parking très sympa Chemin à gauche après avant dernière cascade, avant les passage de l'échelle et mains courantes fixe pvc, ce chemin permet de remonter à l'aval en 20min Moyen ainsi d'éviter une navette Résurgence toujours aussi froide et en bon débit (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/2178/observations.html>)
