Summary: (machine translated) Narrow and short forest gorge under a water drainage		
Hydrology:		
Access: (machine translated) Leave the N-1 Lausanne - Geneva highway at Nyon on Lake Geneva and take the road towards Les Rousses, which winds up the mountain in a north-westerly direction. After 20 km, it meets the N-5, which soon reaches Les Rousses (2.5 km). The route continues via Morez and Morbier to St. Laurant, where the N-5 bends to the north (20.5 km from Les Rousses). We follow it for another 10 km until we turn right onto the D-16 towards Chaux-des-Crotenay. About 1.5 km after this village, turn left (D-127el) towards Les Planches-en-Montagne. Leave the car at the bridge (over the Saine) before the village (parking lot with signs). The canyon can also be reached from Yverdon at the south-western end of Lac de Neuchatel.		
Approach: (machine translated) We walk upstream through the park-like grounds on the south-western edge of the canyon. After about 250 m, you come to a viewpoint from which you have a good view of the canyon in both directions. After another 150 m you come to a dam with a power station. Cross this towards the other bank. Before crossing the last stream, turn left onto a walled "peninsula" and from there turn right into the river bed. The book mentioned below indicates a different entry - rappel approx. 30 m below the dam from the orographic right side for 15 m.		
Tour: (machine translated) Narrow and dark forest gorge, which opens up some possible jumps at the beginning. At the 30 m abseiling point, you can also abseil to a ledge after approx. 13 m and downclimb or jump the last 5 m from there. There are 2 other canyons nearby (Bief de la Ruine and Gorges de Malvaux).		
Return: (machine translated) After the bridge, turn left up to the parking lot.

Automatisch importiert von Descente-Canyon.com für Canyon Langouette Gros débit dans l'absolu mais DC pour ce parcours avec les rappels hors d'eau. Station hydro à 0.5m³/sCorde à noeuds en place pour remonter la C5 (un noeud en haut un peu usé). Bout de corde très usé pour remonter la C2, glissant et la vasque est siphonnante. Saut de la C5 bien délicat avec le glissant de l'appel.Un rôti (marcassin ou chien) tourne dans une vasque intermédiaire de la C30. Automatisch importiert von Descente-Canyon.com für Canyon Langouette DC (200l/sec à la station de la siam). Magnifique étroiture ! Une belle descente mais trop courte (environ 1h pour notre 1ère). On a pu utiliser la tyrolienne d'un guide depuis la C5. Merci à lui :)Départ depuis le balcon n°1 (main courante puis rappel). On a remonté sur les MC en fixe pour accéder aux vasques en amont (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/2201/observations.html>)
